MICHAŁ BĄK

President of POLBOAT - the Polish Chamber of Marine Industry and Water Sports

Dear Madams and Sirs,

The Polish marine industry has been developing for years. Currently, the marine industry is considered one of the most important, most innovative and most dynamically developing branches of the Polish economy. The potential of our shipyards amounts to 25,000 recreational vessels per year. In the segment of motorboats up to 12 meters in length, we are the European leader and the second producer in the world, just after the United States. These are boats produced both - under Polish brands and for large foreign Partners. We are proud that

our industry produces many foreign brands, this proves the high position of the Polish marine industry in the world and shows that it is truly competitive. Due to a smart policy of reinvesting most of the income generated in the last two decades, our factories are among the most modern ones in Europe. In total, the sector comprises around 1000 companies throughout Poland. In recent years, boatyards in Poland have made significant investments that will increase production and strengthen the position of the European leader.

Another important fact is that the Polish marine industry is more than just yacht yards and includes a highly developed network of producers of components and parts, as well as suppliers of production and maintenance materials for boats and yachts. The superb quality of the services allowed many of our suppliers like Kotniz, Sail Service, Pacyfic and many others to establish lasting cooperation with leading producers of yachts all over the world.

Currently, the biggest problem is, of course, inflation caused by the war in Ukraine and the related increase in costs the decline in orders for boats. During the market recession boatyards in Poland are trying not to

waste time and invest in the expansion of production space, restructuring and developing prototypes of new boats. The premium market will develop, and with the increase in labor costs and the production of boats in Scandinavia and Western Europe, it seems possible to transfer the production of larger models of foreign brands to Poland. This may be an opportunity for subcontracting for many manufacturers who will be forced to limit the production of boats under their own brand.

The boating industry in Poland is becoming more and more "green". The production of boats is carried out with respect for the natural environment and sustainability. Ecology - it is not only a slogan, but above all the idea that guides manufacturers of yachts and motor boats, it is our future. Let's hope that, just like on land, progress in the development of marina infrastructure will keep pace with the development of propulsion technologies.

The organisation which comprises the leading entities active in the broadly defined marine industry in Poland is POLBOAT - the Polish Chamber of Marine Industry and Water Sports. POLBOAT is a member of ICOMIA and EBI, international or-

ganisations of the marine industry, in which our representatives are members of supervisory boards. This clearly demonstrates the position of the Polish marine industry in the international arena.

I am proud to be the new President of POLBOAT and happy to present the latest edition of our catalog - "Boating Industry in Poland", which in a concise and transparent way promotes and presents our industry on the international arena. This catalogue is a collection of information on the leading companies active in the marine industry in Poland. I would like to recommend this publication to all the current and future partners of our industry, as well as to everyone interested in its development. I am confident that this catalogue will contribute to disseminating the knowledge about the marine industry in Poland and abroad, as well as to establishing many beneficial trade relations.

At the end, I would also like to thank all people involved in helping us to compile this catalogue.

THE BOATING INDUSTRY IN POLAND

Poland has a long sailing history and a rich tradition on boat building. Now, the Polish boating industry, with approximately 1000 companies, employing over 55,000 workers is the jewel in the crown among the main branches of the Polish industry. Polish boatyards are modern, they use new technologies and the best available materials. The annual potential of shipyards in Poland is estimated at more than 25,000 vessels.

Poland is generally a good place for the development of water tourism and the boating industry. The Polish coastline is 440 km long, we have over 7,000 lakes and more than 600 inland and sea marinas. After the end of World War II in 1945 when borders changed, Poland's coastline increased from 30 to 440 km, which

aroused an exceptional interest in the sea and in water sports among the Polish people and opened new opportunities in the development of maritime economy.

Polish shipyards are modern, they use new technologies and the best available materials. Managed by experienced and well-educated staff employ qualified workers, they can build any type of vessels in the highest quality. Poland is the European leader in production of motorboats of 6–12 metres in length and has the second place in this regard in the world, just after the US. The annual potential of shipyards in Poland is estimated at 25,000 vessels. 95% of the production is for export. The main directions of exports are United States of America, Western Europe and Scandinavia although Polish companies are also boldly advancing into the Mediterranean Basin as well as into new, attractive markets of Asia, Canada, Australia and United Arab Emirates.

The largest and most important yacht yards are located in four Polish regions: Western Pomerania

(Szczecin), Pomerania (Gdańsk, Gdynia), Warmia and Masuria (Ostróda, Olecko, Giżycko) and Podlasie (Augustów). It is there that more than 80 % of Polish sailing yachts and motorboats are produced. These four regions are the cradle of Polish sailing and the marine industry. It is also there that the industry's scientific and research base has been developing, which in turn has given the industry a strong position in the international markets. Establishing this base required many years and the efforts of many skilled people.

Our high position is the result of work of people who spent years designing and constructing sailing yachts and motorboats. For more than 40 years, we used to belong to a communistic block of countries where each state had designated sectors of economy to specialise in. Poland was given the task of producing yachts for all the other members of the communist bloc. Small private shipbuilding workshops were replaced with large, state-owned yacht yards, which were to generate inflow of foreign currencies and win Poland the recognition of the Soviet Union. Even now, many

of the yachts cruising the waters of the former Soviet Union – Russia, Ukraine, Belarus, Lithuania, Latvia, and Estonia – are labelled as 'Made in Poland'.

In the last two decades, production of yachts in Poland has been growing rapidly. We can assume that the real potential of Polish yacht yards exceeded 25,000 per year. In the last ten years the structure of yacht production changed to slightly larger, better equipped and more expensive vessels. The value of exports of the Polish yacht sector increased from USD 318 million in 2013 to USD 1.172 billion in 2022.

Polish shipyards produce both boats under their own brands as well as for foreign contractors. Poland is an attractive location for the production of boats and yachts because of our outstanding technical and management personnel, high technical culture, the experience and skills of our workers, as well as the still relatively low costs of labour. Each year, the high quality of the yachts produced in Poland brings them numerous prestigious awards and even more

nominations for Polish companies in competitions organised throughout the world. Galeon Yachts, Sunreef, Delphia, Northman or Parker Poland are a well-known and appreciated Polish brands. Besides that there is a long list of distinctions for boats produced in Poland for Western brands – Saxdor, Jeanneau, Beneteau, Axopar, Bayliner, Windy and many more. In addition, new, young and dynamically developing shipyards are emerging that will soon accentuate their presence on international markets.

The industry's success results, among other things, from strong cooperation between business and scientific and centres educating technical and managerial staff. Polish designers and manufacturers introduce innovative and modern solutions that actually dictate trends and become an inspiration for other manufacturers. The latest technologies used on board the yacht are designed to allow people to enjoy every moment spent on the water. Poland is famous not only for the production of high-quality boats, but also components for them. The implementation of

new technologies will allow us not only to achieve greater work efficiency and increase production, but also to achieve the highest possible standards related to environmental protection. We have companies in Poland that produce basic yacht components (hull, mast, etc.) from glass, carbon and kevlar fibers using the vacuum, infusion and prepreg methods. We also have boatyards producing aluminum and steel vessels, offshore and civil structures. Of course, most boats are made of traditional laminate. However, shipyards are increasingly interested in natural fiber composites. Some boatyards are working on units made of flax fiber-reinforced composites and biological resins, which are an innovative alternative to traditional composite structures made of glass fiber-reinforced polyesters with comparable properties. Most of the materials used in production will be fully recyclable and the carbon footprint will be minimized.

Currently, the biggest challenge for engineers is ecological, emission-free driving, but it is a necessity. More and more fuel cells are appearing on the market, but they are still

difficult to use. Compact generators are becoming increasingly popular as an addition to a boat installation that allows for complete independence. High-power inverter systems based on lithium batteries are also becoming more and more popular but customers are aware that infrastructure and charging points are needed commonly available.

Boatyards in Poland also use solar panel systems that allow for full integration with the composite structural elements of the yacht. Modern solar panels are lightweight and can be installed on any surface of the yacht, including the hull, superstructure or mast, thus increasing the production of solar energy.

A new trend is modular power generators for use on yachts, based on hydrogen cells. The engines are analogous to the latest achievements of well-known electric car manufacturers. The hydrogen component is adapted to this project. The whole thing will be powered by industrially available hydrogen cylinders to solve the refueling problem. Hydrogen is not a marketing slogan here, but a real energy source. It will be a small hydrogen power plant. This revolution

is ongoing, we would like the process to run more smoothly, but in the case of yachts we are dealing with an important element: the safety of sailors. The boating industry includes not only boats and yachts manufacturers, but also comprises a great number of various suppliers. Most of them co-operate not only with Polish shipyards but also with famous brands from the world. We have great design companies, a lot of CNC centres, metal hardware manufacturers, producers and distributors of chemical products, sail makers, producers and dealers of engines and electronic, producers of photovoltaic panels, upholstery, lights and also clothes and other products for sailors.

The organization associating and supporting companies is POLBOAT - the Polish Chamber of Marine Industry and Water Sports. POLBOAT was established on 11 May 2006 in Warsaw and since then is the voice of the industry in dialogue with the national authorities as well as international entities. POLBOAT is an association of boatyards, producers and distributors of accessories,

suppliers of equipment, the media sector and personalities related to the yacht industry. Our members cover 75% of the total sector's output. POLBOAT is a member of the International Council of Marine Industry Associations (ICOMIA) and the European Boating Industry, international industry organizations in which our representatives are board members. This clearly proves the position of the Polish boating industry in the international arena.

POLBOAT cooperates with the Polish Ministry of Education and Science, vocational secondary schools providing education in boat construction and with the Faculty of Shipbuilding at the Gdańsk University of Technology. Currently, POLBOAT is preparing to build a professional training center for adults, educating specialists in all watercraft production processes, from design, lamination, assembly of various systems, up to the finishing stages - carpentry, metal hardware or yacht upholstery. Thanks to these activities of POLBOAT, it will be possible to solve the problem of lack of qualified staff in Poland in the near future. Since 2020, POLBOAT has been organizing

the Grow Boating campaign "Become a boater", addressed to people who have never had the opportunity to sail before. Several thousand people took part in free cruises on a sailing yacht or a motorboat, and the information provided made it easier to take further steps on the water.

POLBOAT is also the organizer of the Polboat Yachting Festival, which is currently the largest event on the water in Poland and a great celebration of the Polish sailing industry. Every year in July in Gdynia you can meet almost the entire Polish boating industry in one place. Therefore, although only four editions have taken place, the Polboat Yachting Festival is recognized as a one of the most important European events. More than 100 motorboats, sailing yachts, catamarans, houseboats, ribs and jet skis from leading Polish boatyards were presented, as well as many foreign boat brands available on the Polish market. Additionally, there is the Exhibitors Area in tents on land. Great attractions for visitors and free admission cause that the event is visited by thousands of people.

ADRIATICA SP. Z O.O.

19-400 Olecko, ul. Przemysłowa 6
mobile: (+ 48) 668 036 979
kontakt@adriatica.com.pl

Adriatica Yacht Upholstery is one of the largest manufacturers of yacht upholstery in Poland, working with the world's leading shipyards.

With 30 years of experience, we offer our partners and individual customers modern solutions, the highest quality materials and expert advice and execution at every step of the project.

We constantly invest in the development of our machine park. Innovation

and attention to detail make us leaders in modern manufacturing solutions.

Our design office is always actively involved in the process from idea to finished product, putting quality and client satisfaction first.

AGACHEM S.C.

97-300 Piotrków Trybunalski, ul. Zalesicka 137
mobile: (+48) 785 777 502
e-mail: export@agachem.eu
www.agachem.eu

We are the manufacturer of MOBILE TOILET. The most effective concentrate for drainless toilets used on yachts, airplanes, buses, campers, trains, portable toilets, summer houses etc.

2 in 1 - The only product in Europe for the lower tank and the upper flush.

Main advantages of the product:

- Reduction of gases, sediments and unpleasant odors
- Facilitation in emptying of the toilet container
- Accelerated dissolution of the contents of the main container

- Effectiveness in the temperature range from -20 to +40 ° C
- Reduction of the bacterial growth
- Pleasant smell
- Blue color
- Inductive closure system
- Medical product
- No biocides

- No expiry date
- Dilution 1:100

In November 2017, at the Katowice Fair our MOBILE TOILET received the prestigious prize: "The Nail of Wind and Water Trade Show", awarded for the last 27 years.

Odor Stop – is a modern and innovative product for neutralizing odors. It removes undesirable odors occurring in confined spaces such as: yachts, coaches, campers and other closed spaces.

The most important features of the product:

- Perfumes composition without allergens
- Subjected to independent performance tests

- Very fast operation time
- A modern and effective fragrance odorizer
- Active particles eliminate the causes of unpleasant odors
- It neutralizes the smell of cigarettes and sulfur
- Does not cause stains
- The product is safe for materials and surfaces to which it is applied
- Product also has other neutralizing properties, effectively eliminating growths and eruptions
- A dedicated product: Sailing stores, charter companies, cleaning companies.

AIRMECH

80-642 Gdańsk, Ul. Stogi 21
e-mail: info@airmech.pl
www.airmech.pl

Our offer is based on well-known, reliable, very high quality brands. Every year we participate in wide range of leisure and commercial projects.

Airmech cooperates with the biggest shipyards in world. In cooperation with the biggest design offices, our experienced engineers provide full sup-

port in designing process. We are an experts in following fields:

- Air-Conditioning systems - Domestic
- Sewage Treatment Plants - Tecnicomar
- Power supply systems - TBS Electronics
- Chargers and Inverters - Xantrex
- LED Lighting - Shadow Caster
- Fire suppression and detection-system - Fireboy-Xintex
- Ultrasonic tank monitoring solutions - Mopeka
- Instruments, levels sensor and TFT screens - Veratron
- NMEA2000 and NMEA0183 - Actisense
- Automatic Grease Trap Units
- S/S parts, anchors, windlasses, propellers and much more...

Our wide technical knowledge and

experience in real work gives us an advantage on the market. Airmech's sales department provides high quality customer service. We are very first in Poland, certified by NMEA Organization, official NMEA2000® Installer. Based on that we can pro-

vide NMEA0183 and NMEA2000® design and installation service all over the world. Our service is based near Gdańsk in north of Poland to carry very quick reaction time for Baltic Sea customers. Please don't hesitate to contact us!

AIRSLIDE SP. Z O.O.

63-640 Bralin, ul. Nowa Wies Ksiazeca 4A
mobile: (+48) 661 943 470, 627 819 610
e-mail: office@airslide.pl

AIRSLIDE hovercrafts were designed to hover over any flat surfaces including water, snow, sand, ice, mud and grass. Powerful and reliable Rotax engine with MPI-electronic injection. Low weight enables road transport on special dedicated trailer. Strong and lightweight hull constructed of fiberglass. Permanently pressurized four-cell loop designed for greater stability and displacement. Very strong and durable skirt system. We have 15 years of experience in the design and construction of hovercrafts.

Hovercraft can operate over land, shallow water, reefs, ice and mudflats, beaches, river-deltas and dry river-beds.

In our offer you can find also PRO-

FESSIONAL RESCUE HOVER-CRAFTS

Hovercraft are perfect vehicle for the floods, for the swamps with vegetation in water, for snow & ice areas,

for mud and for all type of hard terrain.

100 % environment friendly vehicles. Hovercraft do not damage the vegetation and leave no tracks be-

hind.

Their amphibious capabilities give Hovercraft significant advantages over any other conventional displacement vessel.

ALTAQUESTA

80-126 Gdańsk, ul. Jarzebinowa 18
mobile: (+48) 583 500 655
e-mail: info@altaquesta.com
www.amperflex.com, www.altaquesta.com

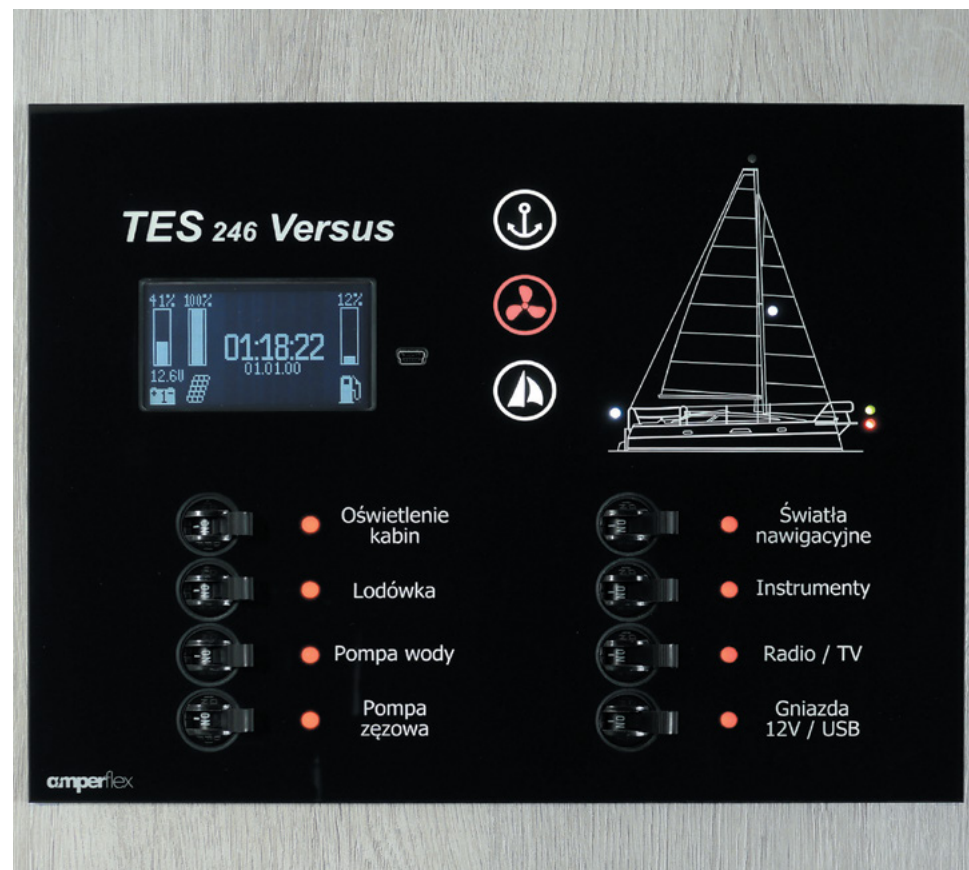

ALTAQUESTA is a company active in electronics branch. The company operations began in 2012, its goal was to create and produce new innovative electronic solutions for the equipment of yachts, motorboats and special vehicles. It sells its products under AMPERFLEX brand, which is being promoted in the yachting industry and sailing markets.

Altaquesta specializes in yacht electric and electronic installations, especially in their metering.

The company conducts research and development activities. Thanks to this work innovative solutions have been created, such as the On-board Mini Monitor battery and tank monitoring system. It allows monitoring up to 6

batteries or 6 tanks. This is probably the most functional, universal and cost effective system for managing of energy and media on the yacht.

AMPERFLEX widely using new technologies in their products. The company has developed isolators (separators) to charge the batteries, which are built innovatively with

MOSFET transistors but in SMD technology. All devices are controlled by modern powerful 32-bit ARM microprocessors, data is transmitted in a digital networks, effective power systems ensure minimal energy consumption.

The AMPERFLEX brand is also famous for its control and distribution panels, which are custom made for specific size. They are characterized by modern design, exceptional functionality and aesthetics of finish.

The AMPERFLEX offer includes:

- monitoring and measure panels
- control and distribution panels
- isolators and low voltage battery protectors
- tank sensors
- chargers and inverters
- breakers
- electric equipment (busbars, switches, connectors)
- LED lights
- solar panels
- navigation electronics

AMPROS SP. Z O.O.

05-800 Pruszków, Aleje Jerozolimskie 424A
e-mail: hello@ampros.pl
www.ampros.pl

Ampros is a company driven by a passion for innovation in the maritime industry. Before our company was established, we worked on creating the first high-voltage electric propulsion system, which underwent extensive testing over several years. What drives us is the desire to create excellent and safe electric and hybrid propulsion systems for yachts. We are committed to continuous development and exploring new areas in the maritime market. We are not afraid of challenges. We are determined to create innovations that transform the industry.

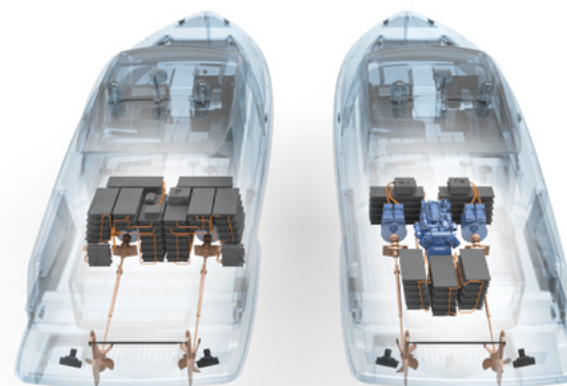

The architecture of our propulsion system is flexible and scalable, which results in a wide range of electric and hybrid drive solutions adjustable to various specific requirements and future customization. Now in our portfolio we can offer hybrid/electric

propulsion systems from 110 up to 6000 kW, diesel and hydrogen range extenders, Ship Management System and integration of the whole system. Our electric propulsion with the Ship Management System offers high performance (25kn+),

long ranges and safety. The software is seamlessly integrated with hardware, ensuring redundancy in electronics and software for safe and easy operation. Our system excels

in battery management, allowing large energy storage and continued operation even in the event of a cell, battery bank or string failure.

The performance of 57ft luxury yacht with Ampros hybrid propulsion system:

- 2x electric motors with continuous power of 800kW
- 0-20 knots in 7 seconds
- 1MW in peak during acceleration
- max. speed 25+ knots
- cruising distance with REx up to 500nm.

ANTILA JACHT

26-600 Radom ul. Przemysłowa 8
phone: (+48 48) 363 30 39
mobile: (+48) 602 634 835
e-mail: info@antila-yachts.pl
www.antila-yachts.pl

Antila Yachts is a reputable yacht shipyard specialising in the production of the sailboats of polyester glass laminate. Our yachts are designed and built by the team of experienced and well-qualified Polish boatbuilders.

Such approach allow us to create an individual configuration of the yacht together with the client, which would meet the expectations of the future owners.

In order to guarantee the exchange

of experience between our company and the customers, we participate in international leading boat shows and exhibitions. Last year we were honoured with numerous awards, including:

- Zwycięzca w kat. Jachty żaglowe do 7,5 m - Warszawa 2018
- Złoty medal w kat. Jachty Żaglowe - Boatshow 2017
- Gwóźdź targów Wiatr i Woda - Warszawa 2017
- Nagroda za wyrób Wiatr i Woda - Warszawa 2017
- Gwóźdź targów Wiatr i Woda - Katowice 2017

AQUATIC YACHTS

05-200 Wołomin, ul. Lipińska 108
mobile: (+48) 604 279 626
e-mail: kontakt@aquatic-yachts.pl
www.aquatic-yachts.pl

Aquatic Yachts is a Polish family shipyard specializing in the production of sail yachts. Its main aim is to satisfy the needs of those for whom sailing is a passion, of those who are looking for a fast boat with a sport profile, and of non-professional sailors who like to spend their time sailing a comfortable yacht.

In 2013, Aquatic Yachts presented a new model of a sail yacht – Aquatic 25T, with new solutions in terms of cockpit and deck area development and large windows ensuring the optimum amount of daylight. The cabin has comfortable bunks, located at the stern, bow and in the mess, which can accommodate up to eight crew members. In the new yacht, the producer put the stern bunk a bit higher and in the present form the

bunk exceeds the standards promoted for 7.5 metre-long vessels. Thanks to the higher stern bunk, there is more space for the crew for resting and storing personal belongings.

In its standard version, Aquatic 25T has many functional shelves and lockers, which provide enough space for the luggage of the entire crew. The galley consists of a cooker, sink and functional cupboards. Each vessel has a separate bathroom cabin with a chemical toilet, washbasin and space for sailing equipment. The boat is equipped with energy-saving LED light bulbs, which perfectly illuminate the cabin after dark.

In the premium version, Aquatic 25T has a yet richer equipment, including: a galley with a fridge, heating, TV set and loudspeaker system connected to the radio. On the outside, it has a modern navigation system, a shower on the stern and the highest-quality fittings and capstans. One of the many assets of this vessel is its 0.33 m draught, which allows it to approach even the least accessible shores.

Aquatic 25T combines perfect nautical characteristics with a sports profile, which puts it in the lead of 7.5-metre tourist vessels. Yachters appreciate the boats produced by Aquatic Yachts, which let them experience the pleasure of sailing to the fullest.

AQUAVENDO

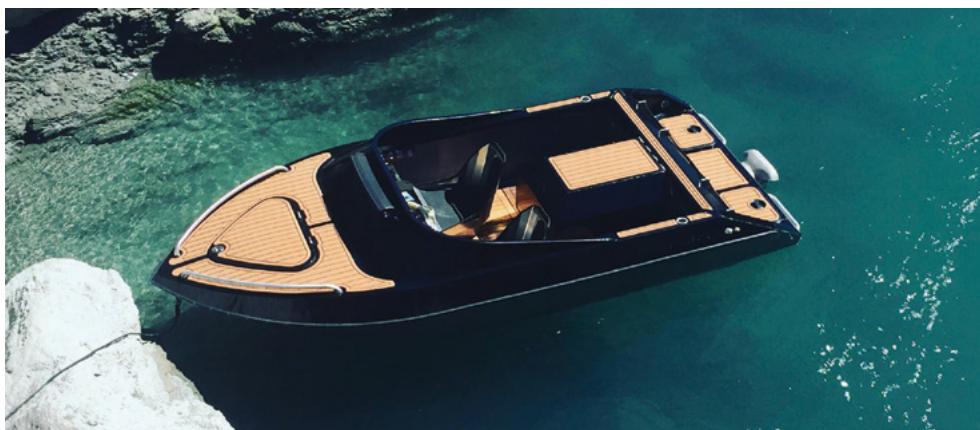

AQUAVENDO

95-015 Głowno ul. Łódzka 15
mobile: (+48) 794 731 825
e-mail: biuro@aquavendo.com
www.aquavendo.com oraz www.vendeck.com

We are the first distributor of VENDECK foams for routing on the Polish market. Since 2017 we have been cooperating with Ultralon – a New Zealand-based producer of foams which is a global leader in the industry. We offer over 25 colors of foams which we can route into any shape according to our client's wish. Every year the scope of available colors is expanded, and new interesting combinations are possible.

VENDECK foam is an EVA type polythene foam constituting a modern solution thanks to which you can easily change the appearance of any unit. The foams are extremely light, anti-skid, they do not heat up and do not require any maintenance.

Our company has an advanced and versatile machine park, starting from a portable 3D scanner which enables us to scan any deck, through stationary scanners used for mold processing, CNC machines, a laser and plotters.

We prepare foams in the form of ready-made panels, routed into a required shape, easy to install as they are self-adhesive.

Since our staff has experience in yacht construction, we are able to implement every, even the most complex, project as we perfectly understand the specifics of this industry. As far as clients preferring more traditional solutions

are concerned, we also offer PVC decks by Deck King or Flexiteak or natural teak decks made of top-quality selected wood.

We cooperate with major Polish producers of yachts and boats as well as with distributors and dealers of international brands.

We operate quickly and professionally.

AURA - GIERS SP. K

73-108 Kobylanka, ul. Szczecińska 30F
phone: (+48 91) 57 91 900
e-mail: aura@auramarine.pl
www.auramarine.pl

The enterprise was established in 1997. Since then, it has been constantly developing its offer, to become one of the most important distributors of yachting products in the Polish market. The main aim of our activity is the distribution of articles for the yachting industry, sports and water recreation.

We mainly supply products to shipyards and specialised yachting shops. In addition, we offer retail sales in our own shop and online shop.

Aura sp.j. is the exclusive Polish distributor of many reputable producers. Our offer includes products of companies such as: Lewmar, Whale, Barton, Shurflo, Plastimo, Lalizas, Can-sb, Mavimare, Attwood, Aqua Signal, Can Original, Multiflex, Kus, Ancor,

Maesterini, Ossian, Ocean Air, So-romap, TMC and others. Striving to meet the expectations of our clients, we try to further extend our offer.

We respect our clients' time and make every effort to complete the commissioned tasks as soon as possible. Among the most important priorities in our activities are: fair trade, satisfaction and achievements of objectives of our customers.

In 2016 the company commenced assembling EDGE control cables for all marine engines in all standard lengths and custom lengths on request.

The cables are very flexible and offer very low backlash, frictionless movement and greater efficiency compared to standard cables.

Your Art of Living - Wooden Sea Maps

Love to travel, sail and explore new - it is a recipe for extraordinary Wooden Sea Maps and Maps' tabletop furniture created in the family manufacture Avocado Creative Studio in Gdansk (Poland).

Each Map and table is an extraordinary masterpiece and a combination of modern technology and eco-design resulting in a product of exceptional aesthetic and educational qualities.

Maps are designed based on navigational, bathymetric and topographic charts. Each shows realistic sea-bed lines and geographical details on the land. Cut by laser with 1/10 mm precision, hand painted and assembled by a talented team.

We can make your customised Map of marina, port, favourite island, coastline and many more. Our Maps are available with frames made from upcycling wood and in two colour themes: grey and turquoise.

Feel the wind in your hair.

Smell the sea water.

Feel the sand under your feet and the sun on your skin.

Hear the sound of waves and sails flutter.

Just you and the horizon.

Adventure. Peace. Nature.

This is the World of Wooden Maps from Avocado Creative Studio - fall in love with it!

Balt-Yacht – modern shipyard with long tradition

Balt-Yacht was established in 1990, when family boatbuilding traditions, reaching far back to the pre-war period, turned into a professional shipyard—the first one in the north-eastern Poland. Today, it is one of the largest shipyards in Poland, producing motor and houseboats of polyester-glass laminates, with hull length from 7 to 12 meters.

For many years till now our main partner is Brunswick Marine in EMEA Inc. for whom large series of Quicksilver and NAVAN boats are produced. For few years we have been cooperating with Norwegian contractors: Cormate AS and Goldfish Boat AS.

Under own brand Balt-Yacht produces 5 boat models:

- Balt 37 Grand - luxurious houseboat- winner of Gdynia Polboat Awards 2022 and finalist of Best of Boats Award 2022
- SunCamper 35 - luxurious ho-

useboat - winner of Jerzy Fijka Award 'Highlight of WIND and WATER' and Boat of the Year 2019 in Poland

In cooperation with Go2Boat, Balt-Yacht implemented a range of Titanium semi-planing houseboats:

- Balt 1018 Titanium
- Balt 918 Titanium
- Balt 818 Titanium – the first semi-planing houseboat in Poland - winner of Polish Yacht Of The Year 2015 Award.

All our boats are attested by the Polish classification society (PRS). Their high quality, international production standards, using newest and top materials and technologies, were confirmed by the ISO 9001:2000 certificate issued in 2001.

The boats are manufactured in modern production halls of about 10 000 square meters on 5,5 ha area by highly qualified and experienced workers and then transported by means of our specially adjusted trucks all over the world.

Thanks to extended experience, professionalism, top boat quality and continual development, after 33 years, about 19 thousand boats have left Balt-Yacht.

From 2015 Balt-Yacht is also able to implement new boat models by means of the state of the art 5-axial milling machine. Through the use of specialized software, we are able to realize even the most advanced projects for various industries, i.e. marine, automotive or aerospace.

www.birddesign.eu

Naval Architecture, Yacht Design studio with FEA and CFD analysis capability. Design office designing sailing and motor yachts. We handle projects at every stage from concept to final product.

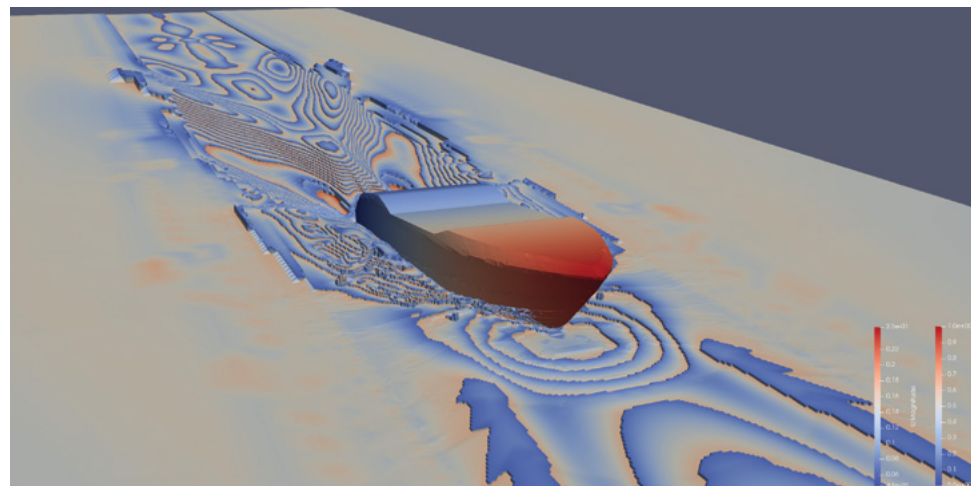

Since 2016, we have been working to make our clients' dreams come true. The design office is the continuation of the dream to realise what is born in our heads.

We design yachts at every stage of the project, from initial design and concept to prototype and series production. We prepare production and delivery documentation, provi-

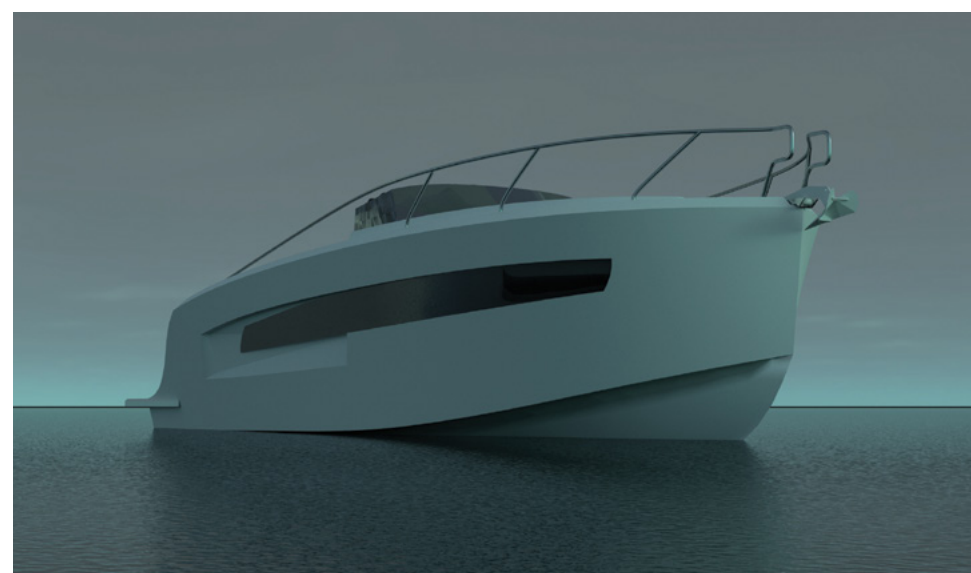

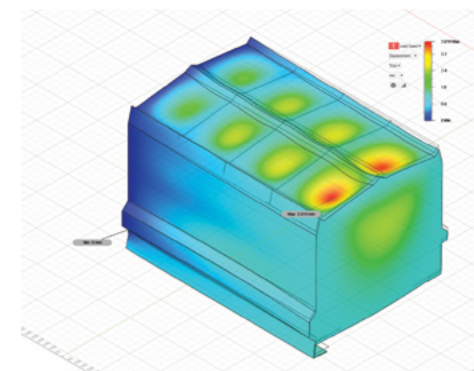

de documentation for captains e.g. stability information. We assist investors with project management and project implementation planning.

We also carry out CFD calculations for resistance optimisation, wave behaviour and propulsion selection.

Design and calculation of lamina-

te structures, execution of lamination plans. Design of technologies, copings, moulds for hand laminates, infusion, LRTM and prepreg. Thanks to our experience gained from projects in the best motor and sailing shipyards in the world, we have the knowledge to help you fulfil your dream of a yacht and make it functional and beautiful.

BRIZO YACHTING was born out of passion and love for sailing. Based on the belief to offer only the best products and to cooperate with the most trusted suppliers, we have become the exclusive distributor of PlasDECK® synthetic decking in Poland, Germany and Denmark.

PlasDECK® is currently the most advanced product on the market. It was developed nearly 20 years ago in the USA, in Akron, Ohio - the world's capital of polymers. It is produced there to this day. Continuous development and close cooperation with world-class engineers have created a product that no other can match. Why?

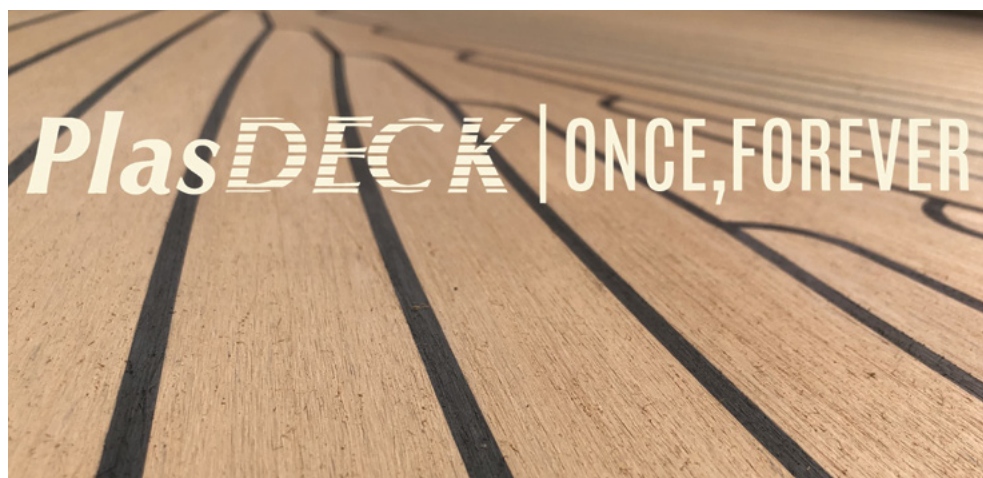

PlasDECK® decking is the only solution that does not age. The oils contained in it (so-called plasticizers) do not migrate, but are fixed in its structure. Thanks to this, the material does not dry out, crack or change its colour over time. It is an unique and proprietary process, protected by US patents as the only such product in

the world.

We offer PlasDECK® in various lines, variants of finishing and colors, thanks to which we can accomplish virtually any project. In addition to the Classic or Performance lines, truly imitating natural teak decks, we also offer REVEAL line decks, manufactured with CNC and thus lifting

any limitations in the deck design. We can manufacture even the most unique and personalized projects. And if that is not enough, for the most demanding customers we even have decks with the caulking made of phosphorescent material and shining in the dark. The possibilities of PlasDECK® are truly endless.

BWP has been operating on the Polish and foreign markets since 2011. We manufacture and process stainless steel, acid-resistant and aluminum products, windshields, boat doors as well as composites.

Our team consists of professional and well-educated engineers as well as creative and talented operators. Our clients are the largest global and European companies producing motor and sailing yachts such as:

- Axopar
- Hanse
- Saxdor,
- Beneteau
- Fairline,
- Brunswick,
- Hydrolift

We owe our success to the constant care for the highest quality of our products, as well as the emphasis we place on technological development.

OUR CAPABILITIES

Due to the high quality of the materials we use, our products are characterized by exceptional durability. Thanks to this, they can meet the quality and aesthetic requirements of luxury products.

A wide range of products that we produce includes:

- Fittings, railings, cleats, hinges
- Rails
- Roof supports, T-tops, Bimini
- Radar masts,
- Ski masts,
- Fuel, drinking water, impurities tanks including those certified in the USA.
- Doors, windows
- Windshields

- Anchor rollers, anchors

- Ladders

- Pneumatic bases for the seat

PROFESSIONAL EQUIPMENT

We have a rich machine park equipped with high-class bending machines, lathes or machines for laser cutting, including CNC. We have a modern powder coating plant and a line for electropolishing steel.

CANNA BOATS SP. Z O.O.

WHEN NATURE MEETS TECHNOLOGY...

Canna Boats introduce an environmentally friendly electric motorboat, CANNA One. It offers a unique and effortless experience – noiseless, zero-emissions and maintenance-free boating in great style.

CANNA One is 5.50 m long and 1.94 m wide, with a draft of 0.51 m

– accommodating five passengers. CANNA One was developed in Gdańsk, drawing on a rich Polish tradition of boat and yacht building. Inspired by the 1950s feel, it embodies an elegant retro design and a positive outlook on the future.

CARAVELA SP.Z O.O. SP.K.

76-270 Ustka, ul. Ogrodowa 8
mobile: (+48) 609 329 632, 609 329 791
e-mail: office@caravela.pl
www.caravela.pl

Our company was found in 2014. We continue and develop the production of yachts and recreational boats initiated by us at Stocznia Ustka in 2003. We deal with designing and implementation of new products into the Polish and West European markets. We offer wide range of boats in four groups: small recreational craft with traditional and electrical drives, RIBs, sailing yachts, houseboats.

We deliver totally outfitted boats at given address including all the necessary documents. We help at registration. Our products fulfill the requirements of EU standards. Conformity assessment procedures are

always performed with assistance of notified Classification Society. The safety and reliable operation is our overarching goal which turns directly into customer's satisfaction.

We manufacture our boats from glass-polyester laminate. We have an experience with epoxy-carbon laminate, vinylester resins and basalt reinforcements as well. In our work we put the effort on quality and productivity. We make the laminates with traditional hand lay-up method

as well as with vacuum technology. Thanks to applying the materials from reputable suppliers we ensure high quality of manufacturing and strength of the structure. We use brand name outfittings which guarantee the worldwide service.

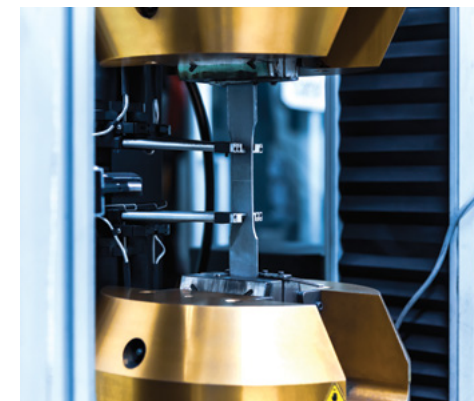

C CUBE offers complex engineering services and scientific research project realization for many industries.

Our main activity is a systematic approach to research services, starting from diagnosing the problem, conducting research, and providing expert's opinion, developing an innovative solution and ending with implementing it in the industry. We specialize in the field of composite materials.

We design structures and control finished products and technological processes through services such as:

- production methods and material audits
- FEM analyses
- non-destructive testing (NDT)
- materials research (measurement of materials parameters for selected load conditions, measurement of mechanical properties, fatigue tests)
- prototyping

As C CUBE we have access to the high-tech equipment and test apparatus which are operated by the representatives of the top-class academic staff with years of experience. We offer a full spectrum of non-destructive material testing, essential for the assessment of the tested component's material condition, without the necessity to interfere with its structure.

Our employees have certificates of completion of courses in ultrasonic tests (level 1 and 2), which meet the standards PN-EN ISO 9712:2012, and they continue to improve qualifications in another types of industry training.

Members of C CUBE have knowledge of materials and mechanical engineering as well as chemistry. They have experience as experts in pro-innovative services where they conducted pre-implementation audits and detailed technological analyses.

CE DESIGN SP. Z O.O.

44-113 Gliwice, ul. Wieniawskiego 26/4
mobile: (+48) 885 044 344
e-mail: cedesign@int.pl

CE Design is a professional and creative company, constantly improving its qualifications, represented by MScEng Adriana Kasprzak.

The owner is a graduate of the Faculty of Ocean Engineering and Ship Technology at Gdansk University of Technology, with experience in the yachting industry in Poland and abroad since 2010 in the field of supervising the process of boat certification and the development of design and structural solutions in CE aspects, in the field of project management and project implementations, as

well as in the field of 3D modeling and design of installations and systems on motor yachts.

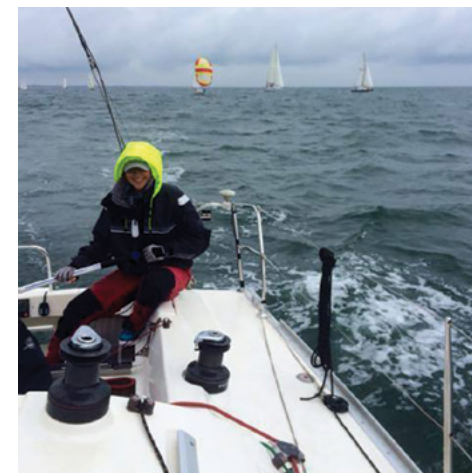

Based on European regulations (primarily the RCD 2013/53 / EU, ISO standards), international (ie CORLEG), American (mainly ABYC, USCG) CE Design offers professional and reliable services in the field of certification:

- supervision of the process of certification of boats and the related counseling
- inspection of the boat in order to verify the compliance of the craft with regulations
- certification documentation performing (calculations, drawings, specifications etc)

as well as in the following areas:

- supervision of the implementation process of new boats from the early design phases to the construction of the prototype boat and putting it into production
- design of installations and systems on vessels
- 3D modeling

Let's look into the future according to the rules...

e-mail: krzysztof@corsiva.pl, iwona@corsiva.pl
www.corsiva.pl, www.coaster-boats.com,
www.nordhval.com

Corsiva Yachting is a family enterprise founded in 2001.

Since entering the market, it has established many contacts and found many customers across all Europe. Beginning on 21st November 2003 the enterprise is owned by Artur Grugel.

As a result of many years of efforts of our experts, all of our Corsiva, Coaster and Nordhval boats have excellent flotation parameters and what's most important are extremely safety. We use only high-quality materials, proved by

attests and declarations of conformity, in the production of our boats and equipment elements.

Before launching to the market, each new model is tested in terms of speed, stability and many other parameters important to our customers. Each boat

is strictly controlled in terms of construction quality.

Corsiva makes both polyester glass laminate and aluminium boats. The shipyard applies the latest technologies available on the market. It also tests and improves innovative solutions by itself.

CP YACHTS SP. Z O.O.

11-500 Giżycko, ul. Bystry 5C

e-mail: office@comarpoland.eu
www.comarplonad.eu

CP Yachts sp. z o.o. is a shipyard located in the heart of Masuria, in the picturesque town of Giżycko.

The company, which has been operating since 2005, specializes in the construction of high-class motor and sailing yachts up to 12m, for leading brands on the global market. The advantage of the company is qualified staff, appropriate equipment and continuous cooperation with Italian design offices, which enables employee training and exchange of experience related to boat building.

Our specialty is not only the production of boats. CP Yachts sp. z o.o. has many years of experience in working with composites. Under the supervision of quality control, in the processes of infusion, RTM and vacuum, high-quality polyester, vinyl ester and epoxy laminates are produced. We also

make our own wiring harnesses developed for the brands we produce. We operate with passion, based on modern technologies and an experienced team. Manufactured yachts are subjected to detailed tests. All work is carried out while maintaining maximum employee safety and ensuring appropriate environmental protection standards. Over the course of several years of activity, we have created a professional shipyard, and our yachts have won awards at world fairs.

CRAFT YACHTS POLAND

76-270 Ustka, Niestkowo 32
mobile: (+48) 500 234 012
wojciech.sikorski@craft-yachts.pl
www.craft-yachts.pl

Craft Yachts Poland yacht shipyard is a place where we manufacture composite products.

We specialize in motor and sailing yachts. Our products are made in the process of manual lamination, by the craft method. The production includes motor boats and sail boats for Optimist children. Our boats can sail on very shallow inland waters, canals, lakes and lagoons. Our “deep V” hulls are perfect for the high seas. The boats have appropriate certificates. Our main product is the Baltica 660 weekend motor yacht, a mini week-

end houseboat for sea and inland tourism, where you will find two double sleeping berths, a bathroom with a sea toilet, mini shower, sinks, stove, external tent and an internal table and outdoor, and many other accessories necessary for a successful weekend on the yacht. All boats are manufactured with due attention to detail and details. We equip boats with engines at the customer's request. Baltica is the premiere of

2019. In the coming years we are planning to launch next yacht models. Quick lead times. Craft Yachts Poland shipyard provides services in the field of:

- Construction of weekend and sailing yachts
- Construction of Optimist sailboats for children
- Manual lamination - repair, maintenance, including water scooters, building custom molds
- Comprehensive yacht service based on developed and delivered projects

- Machine park offering: milling, turning, welding, bending, CNC etc.
 - Sales and maintenance of outboard engines
 - Construction of steel components for yachts, ballast fins etc.
 - Yacht charters
- We are eager to cooperate with companies interested in our products in the area of sales, promotion, advertising, and mainly export in Europe and other countries wanting to represent our products abroad.

CREE YACHT FACTORY

84-123 Rekowo Górne, ul. Sportowa 35
www.creeyacht.pl
bartosz@creeyacht.pl

Cree Yacht is shipyard established in 2008 by Bartosz Puchowski. Company specializes in design and production of high quality advanced yachts.

Our unwavering commitment to excellence has propelled us beyond boundaries, leading us to the realm of luxury yacht production, where extraordinary maritime experiences come to life. In 2019 World wide brand VANQUISH YACHTS responded to the market demands and decided to implement the VQ40 composite motor boats. They have chosen us – Cree Yacht as the manufacturer due to our extensive experience and high quality of our products. Cree Yacht is trusted partner not only on the water.

Cree Yacht projects

- 18 composite luxury motor boats each year
- Product implementation from the project through the production (including painting) and sea trials to the customer handover
- Advanced marine systems implementation
- Customisation
- Electric boats
- Numerous R&D projects
- Refits
- Carbon constructions

Fastmode RIBs

Experience in high – tech composites production, marine design and passion for sailing brought us to the unique project of the FASTMODE RIBs dedicated to the coach needs - the new chapter for the Cree Yacht has started in 2021. Whether you are a seasoned coach or a passionate sailor looking to embark on a coaching journey, FASTMODE RIB will definitely improve your experience.

CREMO

CREMO COMPOSITE SP. Z O.O.

89-620 Chojnice, ul. Przemysłowa 12
sales: (+46) 340 161 70
e-mail: info@cremo.se
production: (+48) 694 659 606
e-mail: info@cremopol.pl
www.cremoboats.se; www.cremocarbox.se

Everything starts in 1958 in Sweden...

Cremo Pol Sp. z o.o started its activity in 1998 as a continuation of the Polsport Yacht Shipyard. Based on the experience of its predecessor, the company dynamically fulfilled orders for products of the popular Crescent Boats brand. In 2006 production was moved into a brand new facility with over 6000 square meters underroof space, and over 30.000 m2 of land. In

2019, after the change of ownership, subdivisions were also restructured. Cremo Composite Sp. z o.o., (earlier Cremo Pol) works as the production facilities of Cremo Boats, Cremo Carbox and Cremo AB, successfully producing boats (earlier Crescent & Monark Boats Sweden), roof car boxes, and various types of products for industry, such as covers, bath-

room modules elements, and electric transformer station elements. Cremo Composite is a proud member of the Intaga AB group, which, in addition to polyester-glass laminates,

gathers among its companies various industries, such as: metalworking, heating systems, trade in industrial machinery and equipment, and participation in the real estate market.

D-BOAT

05-250 Radzymin, ul. Weteranów 100
mobile: (+48) 511 199 909
e-mail: info@d-boats.com
www.d-boats.com

D-Boat is a response to the market demand, which has so far lacked an alternative for those who want their boat to be distinguished by unique design, offered at a competitive price. The entire production of the D-Boat brand takes place in Poland, and the components used for production have been carefully selected and come from Italy, France and Germany. What characterizes D-Boat is attention to the smallest details, unique character and the ability to personalize your motor boat in any way.

D550: A Blend of Elegance and Functionality

The D550 is a sleek 5.5-meter Coupe-style boat falling under category C, offering ample space for up to five individuals on board. Designed with a comfortable sleeping cabin for two, it

effortlessly combines style and practicality. Launched in 2017, this model quickly gained traction, capturing the hearts of boating enthusiasts not only in the Poland but also in USA, Spain, Germany and Malta.

D6: Pioneering Innovation with "BASALT CORE" Technology - 2024 World Premiere.

D6 is the epitome of comfort within its class of boats. With a length of 6.3m and a width of 2.3m, you have the freedom to take it anywhere you desire and invite your friends and family along – accommodating up to 8 people comfortably. The boat is equipped with an array of features designed for both convenience and aesthetics, including 12 illuminated storage compartments, LED lighting in the cockpit, a dedicated compartment for a passive refrigerator, 14 cup holders, and a deck covered in either SeaDek or Esthec flooring. This vessel stands out in the market not only for its timeless design but also for its

exceptional functionality, making it the top choice for those seeking the perfect blend of style and practicality. What sets the D6 apart is the revolutionary "BASALT CORE" technology used in its construction, incorporating basalt fibers into the boat's laminate. This cutting-edge innovation is globally significant, elevating the hull's strength by an astonishing 300% compared to traditional polyester-fiberglass laminates. The D6 redefines the standards of durability and performance, pushing the boundaries of what modern boat design can achieve.

For enthusiasts seeking the perfect blend of elegance, comfort, and innovation, D-BOAT's D550 and D6 are the epitome of excellence, promising an unforgettable boating experience.

DAS YACHT CENTER

04-474 Warszawa, ul. Amałowicza 14
mobile: (+48) 602 501 799
e-mail: dasyacht@onet.pl
www.dasyacht.com.pl

Since the very beginning in 1990, our shipyard Das Yacht Center is focused on high quality of manufactured products.

It is first private shipyard established after '89 that started mass production of yachts. Our boats Ocean 760 and Ocean32 were nominated to the prize Yacht of The Year by „Die Yacht” magazine. Moreover, our Albatros 4.30 was awarded with Yacht of The Year 2016 prize by magazine „Żagle”. Currently, we are manufacturing custom motorboats, yachts and cata-

marans fulfilling individual needs of our customers. We produce motorboats Dixi 550, Posejdon 640 and Voyager 810. We are also preparing models and forms for composites, and making composite elements for shipbuilding, automotive and various other industries. We have a great deal of expertise in the field of producing composites out of

carbon fabrics by method of resin infusion. Recently, we have established cooperation with Finot Group. Our Albatros 4.30, made entirely of carbon composite, was designed

by Jean Marie Finot. For us collaboration with a such magnificent designer, is an opportunity to meet expectations of even most demanding clients.

DEMEX, founded in 1991, is family, fast growing manufacturer of stainless steel and aluminum equipment for boats and yachts, like: railings, pulpits, ladders, cleats, hinges, etc. Also DEMEX produces tanks for diesel, gasoline, water, grey and black water.

We use CNC cutting and bending machines and also conventional ones. We employ experienced management and technical engineering staff. That together with appropriate

technological processes guarantee the repeatable and high quality production. DEMEX delivers its products to European Clients. All production is supervised by the

Quality Management System ISO 9001:2015 Tanks production is certified by DNV GL, PRS S.A. is a member of Metal Processing Cluster which has the status of Key National Cluster.

Demex is not big company, therefore we are flexible and open for any not typical and tough challenges. We are happy to deliver high quality parts on time to our Clients.

DIRIGO COATING

32-406 Czechówka, ul. Wielicka 29
mobile: (+48) 537 472 628
e-mail: info@imronmarine.com
www.imronmarine.com

Axalta Coating Systems supports the marine industry with Imron Marine Finishes. This product line brings a high-performance product portfolio to today's marine industry, which combines ease-of-use, durability and environmental compatibility in a virtually unlimited color choice.

With Imron Marine Finishes, Axalta Coating Systems provides a paint system specifically developed for yachts, sailboats and power boats, advanced product technologies for superior protection, and environmentally-friendly products to achieve a brilliant appearance coupled with long-term UV resistance. The innovative product technology of Imron Marine Finishes translates into

optimum repairability and buffability for a mirror-like finish backed by the yacht industry's longest and most comprehensive warranty.

When selecting the right paint system, there is no room for compromise. That's why every Axalta marine product is scientifically engineered to deliver the industry's best appearance, performance and corrosion protection. We

offer you a complete range of products comprising primers, fairings, fillers as basecoat, topcoats. All types of plain, metallic and fancy finishes can be specified to make vessels stand out from the crowd.

Imron Marine advanced coating systems:

- Exceptional UV resistance and colour durability.
- Guaranteed gloss level.
- Efficient spot repairs.
- Easy application, guarantee of optimal performance.

- Unlimited choice of colors and effects: solid, metallic, pearl, xyralic.
- The ability to create a color formula at the customer's request.
- Certified warranty.
- Non-aggressive to the environment.

The results speak for themselves – yachts and vessels painted with Imron Marine Finishes require less finish maintenance over time and keep their good looks and aesthetic value for longer.

www.dometic.com

Dometic is a global market leader in branded solutions for mobile living in the areas of Climate, Sanitation, Food & Beverage and Power & Control.

Our job is to meet your essential needs while you enjoy your journey, like the ability to cook, keep food fresh, take care of personal hygiene and maintain a pleasant temperature. That way, you can explore more and stay away longer. We call it mobile living made easy.

Our motivation is to create smart and reliable products with outstanding design. Over the years, our solutions have won numerous awards. While it's always nice when somebody else thinks you've done a good job, it shows our products are doing what they were de-

signed to do.

Dometic makes sure you can enjoy your cruise and the perfect climate in your cabins after a marvellous day at sea, with a wide selection of air conditioners, giving you plenty of flexibility, which is especially important if you are short of space.

Create a pleasant onboard atmosphere with Dometic blinds, available in a wide range of fabric styles to offer effective light and temperature control. Dometic blinds are tailored to your yacht, designed for any size, inclined or shaped window.

Cook what you like, eat with friends, keep your provisions nice and fresh throughout the journey. We have taken care of every detail with our range of refrigerators and mobile cooling solutions.

Enjoy a pleasant feeling of freshness on board wherever the wind takes you. Recap the benefits of our decades of research into marine sanitation systems. With over 75 years dedicated to command and control innovation, Dometic's range of steering and control systems will keep you safe and energised while enjoying the ride on the water.

Individually designed hose kits for boat builders to eliminate unnecessary purchase and hidden costs, but also shorten production times and eliminate assembly errors.

Lower purchase and hidden costs:

- purchase costs lower by 20% and no more surpluses
- elimination 100% cost of Staff and tools for cutting
- elimination 100% cost of hose scrap and the disposal

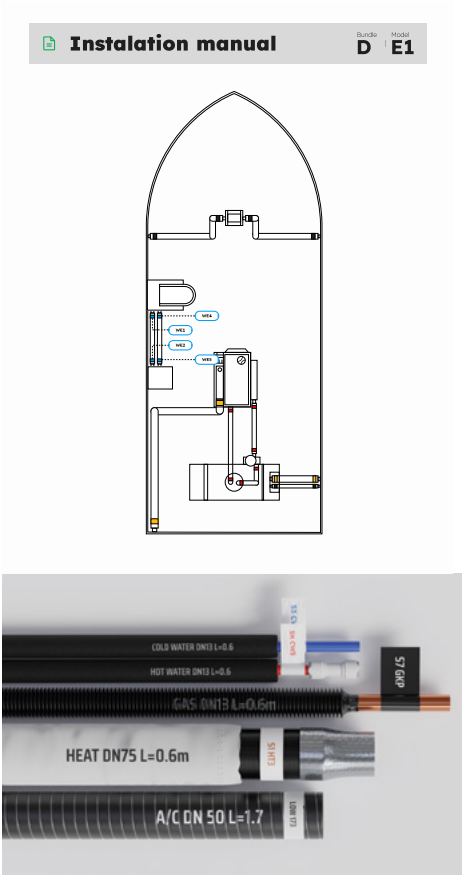

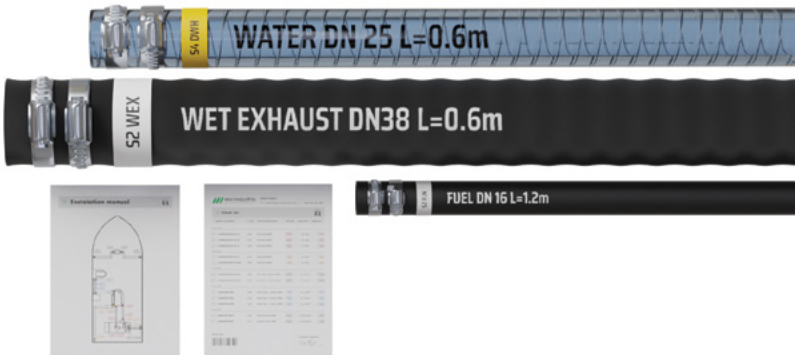

Shorter production times and no errors:

- all hoses for one boat packed into one box

- they are cut to size, with clamps and stickers on
- ready for quick assembly with installation manuals

Easy to install for every employee:

- no technical experience required
- communication in your language is not required
- instalation manuals are easy for everyone to understand

www.eljacht.pl

The Eljacht company was founded in 1990. Since 2000, we have been dealing with the distribution and service of yacht accessories for motor and sailing yachts.

Our main field of activity is electronics and electrical engineering. We work with the largest shipyards in Poland, dealers of sailing yachts and motor boats, we have our own distribution network. We have over thirty years of experience in installing yacht electronics, we provide technical advice and select devices to suit individual customer needs for various types of yachts. We base our knowledge on periodic courses and trainings organized by equipment manufacturers and on the many years of experience of the owner / founder of the company, Captain Jerzy Jankowski. Every year we participate in trade fairs and events related to the promotion of our prod-

uct range. We are open to cooperation with you.

We are distributor of: Raymarine,

FLIR, Mastervolt, BEP Marine, CZone, Marinc, Hella Marine, Scanstrut, Glomex, Ocean Signal.

The main element of emzi boats is motor boats production in series emzi 767.

Exept of production area, the company also deal with designing related with boats at brand emzi design. For our partners the company also provides services:

- Service of motor boats
- Transport of boats in Europe

The feature of our company is individualism and unique. Our product got a lot of awards and medals. Customers and jurors appreciate our design, quality, technical solutions and sophistication of technological.

As a company we try to be visible with the largest brands recognized in the country and abroad. Our group of purchasers expects from us products at the highest level, while we are also open to new technology and challenges which customer has been before us.

The essence of sound quality .

The company Eryk S Concept has been operating in the Polish and international market since 2003. Our business focuses on designing and manufacturing premium and high-end audio equipment. As a boutique company, we design complex speaker systems ranging from loudspeakers to invisible speakers, on water speakers, and digital and tube amplifiers. We collaborate with selected partners only to create a fully flexible and tailored offer, essential to meet the needs of the demanding customer.

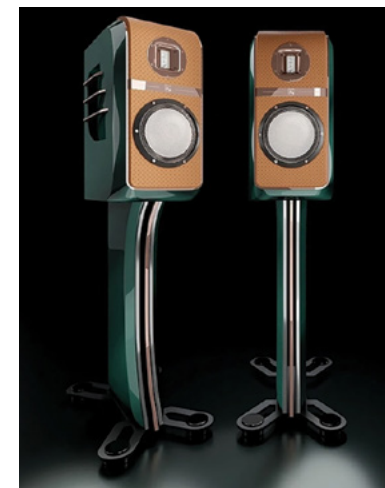

Currently, we have developed a new product line called S Line for the Eryk S Marine division. Our innovative solutions in terms of speaker design and audio installation on water allow us to achieve significantly higher power and sound quality on floating ships

compared to the capabilities offered by other brands in the market. Additionally, our unique approach to fine tuning the audio equipment allows us to achieve even higher results in music reproduction.

Our S Line speakers, as a key end component, combine high power with high temperature capacity, including low distortions and full frequency response. The philosophy of the Eryk S Line approach embodies over twenty years of experience in designing and producing premium, high-end audio equipment for homes and cars.

Key features of the Eryk S Marine offer:

- Premium sound quality
- Unique design approach and aesthetics
- Full system integration
- Professional installation and service

E-TECH STAR INVESTMENTS

05-870 Błonie, ul. Sochaczewska 12
mobile: (+48) 602 627 003, 606 219 712
e-mail: info@etechdrives.com, office@etechdrives.com
www.starboats.eu

Faced with the limitations and inefficiencies of existing electric boat propulsion systems, Star Investments has developed an efficient, maintenance-free and reliable E-TECH propulsion system. Due to the experiences of satisfied users, now these drive systems can be found all over the world. Star Investments has been on the market for 35 years, and has been specializing in the production of electric boat motors for 15 years. Over the years, E-TECH has produced and delivered nearly 1,000 electric motors for 45 different countries around the world.

E-TECH is a global brand manufacturer in the electric motors for boats market. E-TECH offers engines of

various power, from 4kW to 35kW. E-TECH is one of the market leaders in the manufacture of electric motors for boats, producing brushless, synchronous permanent magnet motors. The advantages of this innovative solution are:

- No brushes, no maintenance required
- High performance
- Compact dimensions
- High power and high torque

Such an electric drive can also be a generator, in this mode it can charge the batteries while sailing or in hybrid mode to ensure even longer battery life. All engines are made of seawater-resistant aluminum, so that none of the E-TECH drive systems will ever corrode.

As a manufacturer, E-TECH is able to produce and modify engines taking into account the needs of each

client. Production takes place entirely in Poland. E-TECH is not only electric motors, it is a whole system based on the technologies of our BLDC motors. The engine kit includes: engine, engine controller, throttle, display and other necessary accessories that allow the installation of the system without worries about additional accessories.

In the E-TECH portfolio you will find innovative POD type technology engines, this engines are placed directly in the water, which allows you to obtain high power engines without taking up space on the boat. Internal E-TECH WG engines fit perfectly replacing old diesel engines, which facilitates its installation and reduces the engine installation time to a few hours. The mounting (suspension) is adapted to individual needs.

Eversea is a young company offering modern solutions to the challenge of equipping yachts and motor boats. Our top priority is to support innovative ideas and popularize them in the world of sailing and water sports.

Our offer includes solutions such as: Flexiteek Decks - ideal solution recommended for aesthetic and functional finishing of units. Flexiteek 2G not only perfectly imitates natural teak wood, but it is also a much cheaper material and definitely easier to use and maintain than genuine

teak. It guarantees high level of durability and long-term satisfaction. We provide professional servicing: from pattern design, pattern making and installation. Flexiteek 2G offers 10 colours of planks and 3 colours of caulking, which can be mixed between each other.

FLEXITEEK

A Flexiteek branch serving OEM's around the world. The company supplies its customers with synthetic decks and fenders from WILKS.

Our team consists of experienced people in production, a team of designers and customer consultants. We can provide assistance from design, through product manufacturing, to after-sales service. Direct connection to FLEXITEEK and WILKS ensures constant and timely deliveries. We work with many reputable shi-

pyards with an established position, but also with new brands, that want their boats to look unique.

Our products also reach interior designers who are looking for unusual solutions for homes and offices. We implement individual projects such as garden furniture, tables, interior finishes, swimming pool finishes.

e-mail: maciej.zalewski@garmin.com
www.garmin.pl

Garmin International Inc. is the global leader in satellite navigation technologies for general aviation, marine, outdoor, fitness and automotive industry.

Since 1989, Garmin has delivered hundreds of millions of devices – much more than any other company in satellite navigation market. Company headquarters are located in United States (Olathe, Kansas), United Kingdom (Southampton) and Taiwan (Sijhih, Taipei). Garmin Poland office was established in 2010 in Warsaw (10 mins. of drive from airport). You are welcome to see showroom with exposition for marine, fitness, outdoor, automotive and aviation products. Garmin Poland give full support to marine OEMs in-

cluding pricelist configuration for optional equipment, wiring diagrams, preparing of Bill of Materials, trainings in the factory and tests on the water. At Garmin we strive the best products for everything you do on the water. These brands are part of the Garmin family because they represent the strongest and best of what they do: Fusion Marine Entertainment is world-renowned for engineering innovative audio solutions that are enjoyed around the globe by the most prestigious boat designers and manu-

facturers.

JL Audio designs and manufactures audio solutions, including speakers, amplifiers, subwoofers and other audio components for marine, aftermarket automotive, powersports, home and RV customers.

Navionics Cartography – experience unparalleled coverage and brilliant detail when you are on the water.

Bluechart G3 coastal charts and LakveVu G3 inland maps provide exceptional coverage, clarity and details. EmpirBus Digital Switching brings all the power and convenience of advanced home automation to your vessel, allowing you to control and monitor all onboard electronic systems from your Garmin chartplotter or MFD. Garmin the world's largest and most

innovative marine electronics manufacturer, in 2023 again has been named Manufacturer of the Year for the ninth consecutive year by members of the National Marine Electronics Association (NMEA). The coveted Manufacturer of the Year honor is given to the most recognized company in the marine electronics industry for excellence in product service and support in the field. Garmin was also awarded five NMEA Product of Excellence awards in the multi-function display (MFD), autopilot, safety, multimedia entertainment and mobile application—utility categories. These awards are voted on by NMEA dealers who specialize in installing marine electronics, qualified NMEA technicians and fellow marine electronics manufacturers.

GO2BOAT YACHTS EXPORT POLAND PHILIP DROŹDŹ I KRYSTYNA DĘBOWSKA SP.J.

11-500 Giżycko, ul. Królowej Jadwigi 27 / U 102
NIP 8451983204 REGON 281479884 KRS 0000602448
mobile: (+48) 508 136 857, 607 594 803, 575 987 113
e-mail: info@go2boat.eu
www.go2boat.eu

Since 2011, we have been selling motor and sailing yachts making customers' dreams come true. We were established as YACHTS EXPORT POLAND, a company formed by two partners, Michał Szafranski and Philip Drożdż.

The 2013/2014 season opened a new path for the company-we created and developed the design of the first semi-planing motor yacht on the Polish market - BALT 818 TITANIUM. BALT 818 TYTAN was implemented at BALT YACHT Shipyard. and remains a customer favorite to this day. Sales of more than 120 units place this yacht on the

pedestal of Polish motor yachts, and in first place as a motor semi-planing yacht.

In 2018, the company, expanding its cooperation with foreign partners, transformed into a Company with the current name GO2BOAT Sp.j. The results of the company's work were more unique designs of semi-planing boats,

which, thanks to their assets, dominated the Polish market and became valued yachts on European waterways:

- BALT 918 TYTAN - a semi-planing motor yacht with a salon cockpit from BALT YACHT Shipyard.
- BALT 1018 TYTAN - a semi-planing motor yacht with salon cockpit and Fly Bridge roof from BALT YACHT Shipyard.
- NAUTIC 990 - a semi-planing motor yacht of classic modern proportions from NAUTIC YACHTS Shipyard.
- NAUTIC 990 - a semi-planing motor yacht with a dynamic wheelhouse line with a vertical window from NAUTIC YACHTS Shipyard.

The year 2022/2023 marks another

step forward and business development. GO2BOAT Sp.j. started cooperation as the exclusive importer and distributor of the luxury and innovative Cypriot shipyard KARNIC POWER-BOATS LTD. KARNIC motor yachts have been delighting customers in the Polish market since 2022 with their elegance, over-the-top style, functionality and clever solutions to enhance the quality and comfort of sailing.

Over the years, we have been building customer confidence since 2011. Hundreds of yachts sold allowed us to understand both the needs of buyers and the needs of the motorboat market in Poland. We are not giving up - there are more years of smart and productive work ahead of us.

GREEN DREAM BOATS SP. Z O. O.

42-286 Koszęcin, Nowy Dwór 8
mobile: (+48) 734 155 529
e-mail: office@greendreamboats.com
www.greendreamboats.com

Green Dream Boats is a fast-growing shipyard, located in southern Poland. We are the pioneering manufacturer of innovative, ecological solar boats & catamarans.

Our mission therefore, is making uniquely designed and nature-friendly vessels for our customers to enjoy. The experience and expertise in engineering, naval architecture and renewable energy allowed us to create a perfect boat – our Green Dream - known as Solliner 21.

Our shipyard is actively seeking dealers/brokers worldwide who will sell Green Dream Boats products in local markets. The plan is to create a strong network which can support sales in our company. Our two flagship products are: the Meva 21 boat and the Solliner 21 catamaran. We have the SOLLINER 31 project underway which we expect to launch next year. Another venture - Meva 2.0 is also coming soon.

- Other Individual Requests and Needs, Please Inquire!

Our team is outstanding organizers, director, athletes. Water sports instructors, pyrotechnics, water rescuers and mechanics.

Together, we are able to meet the most demanding challenges. We produce events commissioned by mayors of cities (e.g. Water Show Gdansk and Szczecin), fair organizers (e.g. Polboat Yachting Festival Gdynia) or play major roles in international performances (e.g. Klangwolke Linz, Austria). Taking care of the highest level of services provided, we are constantly training, inventing new services or designing proprietary equipment. This is confirmed by numerous championship titles won by our riders at freestyle flyboarding championships in Poland and Spain.

In addition, as Hydro Sport, we are the manufacturer of Jet Ski Rib pontoons, which improve the safety, stability of watercraft use.

Additional 300 kg of displacement makes the PWC armed with JSR pon-

toon behaves very stable. It does not move even when standing on one side. Without effort e.g. lifeguard can pull the injured person from the side or stern. In addition, the pontoon protects people in the water from contact with the hull of the PWC.

Do you rent PWC and care about the safety of your customers and equipment? Equip your PWC with JSR pontoon and You will definitely reduce the likelihood of equipment damage and in the end costly repairs.

Jachttravel.pl is a dynamically expanding Polish family-run company which offers motor yacht charters in Masuria. Our fleet has yachts of the Polish shipyard Cobra Yachts – Futura 40 Grand Horizon yachts Seamaster 45 and new model Maestro 42.

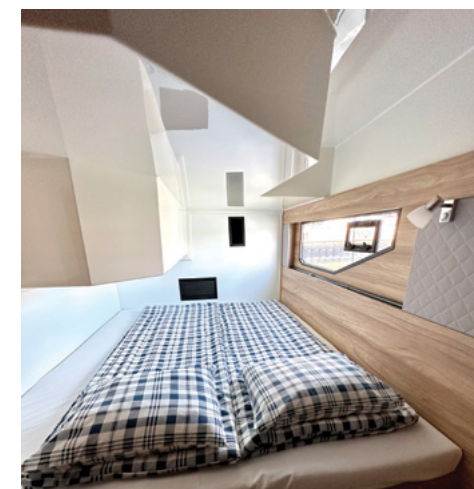

We have created an offer for people dreaming of relax on Masurian lakes, that does not require long preparation. On a yacht that will meet the expectations of the most demanding sailors. Our fleet consists of yachts whose names refer to winds blowing over the waters around the world or derived from the names of great explor-

ers, yachts that lead to unforgettable adventures with family and friends. In comfortable conditions, in each of them, in 3 cabins, 6 or 8 people may rest. Our yachts, 12-14 m long, are equipped with an easy-to-operate motor and bow thrusters, which facilitate maneuvering the boat. The equipment of the yacht guarantees relaxation and

comfort of admiring the nature, the view from the water is breathtaking and is definitely more beautiful than the one we see while standing on the shore. Our team has created such a space that everyone can feel great in it. During the cruise, you can fully enjoy the Masurian landscape: fishing, swimming in the lake or simply relaxing on a comfortable mattress on the bow or on the sofas on the upper deck,

or eating a meal on the gangplank. The marina where we are stationed (Marina Górkło near Mikołajki) is an ideal starting point for any place located on the route of the Great Masurian Lakes - both south towards Ruciane Nida and Pisz, and north to Giżycko and Węgorzewo. In the port area you will find a restaurant (Polish cuisine), sanitary facilities, additional accommodation and parking.

JANMOR 40 years of tradition.

Janmor is the oldest private yacht yard in Poland. We are a family company, established out of passion for sailing. With the experience and professional knowledge of our personnel, we offer boats and yachts of top quality at a reasonable price. The reasons why doing business with us is worth considering:

- We have an Approval by Germanischer Lloyd
- We work with materials of top quality, which makes our yachts and boats very long-lived
- Our employees are qualified and have many years of experience
- We are constantly expanding the offer of our yacht and motorboat We produce boats for other companies under their brand, these contractors include companies from Italy and Norway
- We have considerable experience in constructing boats with electrical propulsion
- We manufacture various products from polyester glass laminates
- We combine tradition and modernity
- We treat all clients and their needs individually

We are open to new partners, we will carry out every idea – from the design, through the model and mould, to the end product.

Visit our website at:

www.janmor.com.pl

Work with us, because quality matters.

JANUKOWICZ JACHT KRZYSZTOF JANUKOWICZ

www.jjacht.com.pl

Outsource manufacturing to Janukowicz Jacht to assemble parts of, or build an entire product.

Being in business for over 20 years has given us a vision that few can match! Our catalog ranges from sailboats to motorboats and basically anything BOAT related! First started on the Polish market - and now as a name to reckon with on the European market, we see no limits to what is possible! From the individual to a company, we are able to fulfill the needs and expectations of the client. Using the thought process, "We treat the client as we would want treated!" it gives us a distinct advantage in the marketplace. And most importantly - our dedicated, properly trained, and skilled team, likes and thrives on a challenge. Using the most advanced techniques and equipment, we have mastered

the art. And that is what defines JANUKOWICZ JACHT.

FURNITURE

We can produce some of the nicest furniture you would have ever set your eyes on for your project. Direct from your needs of design and aesthetics, all of the way to a custom one of kind project, it's all achievable.

CNC CUTTING

CNC technology is necessary in the workshop. As it affords you the opportunity to create either a series of products or that distinctly unique one of a kind project. Our engineer's at Janukowicz Jacht can even digitize your product to the most intricate detail. Whatever the project calls for, it will be done in the most efficient way along with the highest quality. We use a 5 and 6 axis CNC Routers.

LACKING

Our skilled experts are able to apply the proper finishing to the material. If you need a different color or shade, our experts will ensure that it matches your requirements.

DECKS

- Teak - can be tailored to your wishes and needs. Long lasting and the quality shines through.
- Synthetic Teak is a decking op-

tion that provides the elegant look of a teak deck and priced less. Made out of flexible PVC, this material is easy to work with and maintain.

- Vendeck - the highlights of this material is, it is not affected by the sun - your bare feet won't burn from the sun. It's very flexible, and a very lightweight surfacing material.

BOAT BUILDING

This is our specialty! From the initial project, to the creation of forms and models, right to the final product. This includes all installations, fittings, and required amenities!

MOULDS AND LAMINATING PARTS

As it relates to laminates, we work in cooperation with the Janmor Company, recognized as the oldest producer of glass reinforced polyester in Poland.

KOGA SP. Z O.O.

77-200 Miastko, ul. Koszalińska 14
phone: (+48 59) 857 25 95
fax: (+ 48 59) 857 25 95
e-mail: koga@koga-miastko.pl
www.koga-miastko.pl

Koga is a manufacturer of products made of polyester glass laminate by hand lamination, by RTM Light method and using vacuum resin infusion technology. It was established in 2000. The total surface area of the production hall and the office and social premises is 4200 sq m.

Most products manufactured by KOGA originate from the company's own pattern shop, where everything starts from a ready design or just a vision presented by a client. We always make the best efforts to meet the demands of our customers. Large motorboats, sailing ships, sea kayaks and smaller sailboats are sent to the French, German, Dutch and Scandinavian markets. Apart from the vessels, KOGA provides laminate cases to producers of fit-

ness & wellness articles, a producer of astronomical observatories, agricultural machines and trikes. Most of our articles are produced exclusively for individual customers. A new item, introduced to the market in August 2021, is the sailboat AVA-

580, produced under the aegis of KOGA. When designing the boat, the designers put most emphasis on universality, safety, trailer ability, simplicity, reliability and durability. AVA is perfect for weekend family sailing and for training.

mobile: (+48) 536 005 999
e-mail: biuro@lamare.pl
www.lamare.pl

Our shipyard build modern, custom-made houseboats for private, business and promotional purposes.

We offer different hull construction: aluminium, steel or concrete in variety of specifications. Lists of innovations start from handcrafted insulation walls, modern appliances onboard or innovative electric system support with solar panels and batteries.

Houseboats can be used as a whole year units, as an office, party boats, restaurants or summer houses. Companies or

Institutions can buy our products or lease them together with service support and crew.

We are able to fulfil every customers' needs and expectations. All the products are tested and certified by independent subjects.

La Mare charter houseboats on inland waters in the area of Wielka Pętla Wielkopolski in Poland.

Lamdo Yachts is the first Polish manufacturer of exclusive Trawler motor yachts. The shipyard located is in the north-eastern part of Poland, in Giżycko.

The first model in the new line of motorboats was designed by world-famous designer Tony Castro. LY30+ yachts are unique units, 9.6 m long and 3.49 m wide, with 3 sun decks. The company focuses on solid workmanship and pays attention to details. The original design, equipment and finishing are based on the highest quality materials.

The characteristic flattened bow provides a lot of space in the captain's berth. Additionally, the asymmetric structure of the upper deck makes the LY 30+ model recognizable all over the world. LY 30+ is an interesting functional solution and an unusual drawing of the yacht's silhouette, which may soon become one of the innovative and current trends in the design of new floating structures.

TECHNICAL SPECIFICATIONS:

- Max people on board: 6/10
- CE Category: B/C
- Max engine power: 60-300 hp
- 2-person cabin: 2
- Sleeping places: 4 + 2 occasional in the living room
- Total length of the yacht is 9.60 m
- Total width 3.49 m
- Draft max.: 0.45 m
- Height above waterline inc. mast: 3.10 m
- Height above waterline excl. mast: 2.80 m
- Headroom approx. FWDCABIN: 1.95 m

Lamdo Yachts it is like a spacious apartment on the water. The triple-leaf doors and a bar-style tilting window allow for easy creation of an open space between the cockpit and saloon.

LAMINOPOL
LAMINOPOL SP. Z O.O.

76-200 Słupsk, Redzikowo ul. Przemysłowa 14
 phone: (+48 59) 845 34 63
 fax: (+48 59) 845 29 59
 www.laminopol.com
 www.laminopol-dystrybucja.com.pl

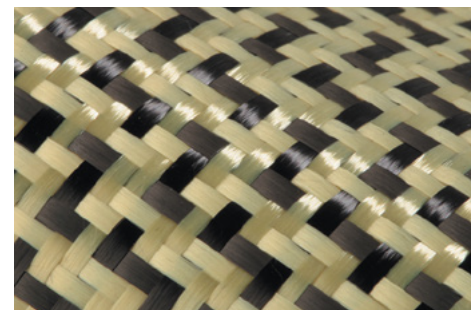

Laminopol, is a trading company, which by its professionalism, commitment and many years of experience, has achieved the status of the largest Polish distributor of GRP processing plants.

Our firm exists on the market since 1989. From the beginning, we have focused on providing our customers with high quality products, safe and on time delivery in combination with competitive prices. We have built the strong distribution network in northern Poland. Our warehouses are located in Redzikowo near Słupsk, Gdansk, Goleniow, Ostroda, Augustow, Chojnice and the head office is in Redzikowo. We also have our own transport fleet. We cooperate with many well-known producers of raw materials in Poland and abroad such as: Ashland, Akzo-Nobel, Sika, Metyx, Lackfa, Lantor, Zywx, Composite Integration and others. Our customers include both companies and

private individuals, for whom we have prepared a rich offer which mainly covers: gelcoats, poliester, vinylester and epoxy resins, curing systems, reinforcements based on glass, aramid and carbon fibres, sandwich materials, solvents, adhesives, release and polishing agents, PU foams, as well as health & safety materials and tools. In order to meet the expectations of our customers, we have dispensers and mixers for making any colour of gelcoats and topcoats. Until recently, we expanded the offer with additional service – accurate cutting of various types of materials with a professional cutter. We also offer technical support. Our technologists provide our cu-

stomers with help in choosing raw materials, comprehensive techni-

cal support and also environmental protection consultancy.

LEGION YACHTS

11-500 Giżycko, ul. Dąbrowskiego 14
mobile: (+48) 507 108 150
e-mail: biuro@legionyachts.com
www.legionyachts.com

LEGION YACHTS: Premium Class Sailing Crafted for You

LEGION YACHTS introduces a novel brand of premium class yachts, synthesizing innovative, distinctive design and exceptional ergonomics with top-tier materials. Our mission: to make the dream of owning a high-standard yacht true for our customers.

LEGION 360: Carefully Crafted for Ultimate Sailing Pleasure

The LEGION 360, a model built by LEGION YACHTS, originates from the drawing boards of Wrocław's University of Art, coming from the seasoned experience of the local charter market, while its aesthetic and craftsmanship aspire to join the ranks of the most advanced

units. Seamless ergonomics combined with a swift hull design ensure optimal sailing enjoyment and exciting experiences.

SPACE & LIGHT: A Luxurious, Illuminated Escape

Indulge in a spacious interior and cockpit featuring an expandable bathing platform, providing a luxurious relaxation space across two levels. Large deck's glazing and windows stretching along the entirety of the superstructure fill the interior with natural light, even on cloudy days. At your disposal are three extensive, lockable cabins, a bathroom with a separate shower, and a comfortable mess.

ERGONOMICS & UTILITY: Navigating with Ease and Comfort

In the mess, attention is drawn to the wide passages, spacious cabinets, and an L-shaped kitchen equipped with two refrigerators and an oven. The skipper's working comfort is ensured by three positions at the steering wheels, and a plotter to display crucial information. With halyards led back to

the cockpit and a self-tacking jib, managing the unit is significantly easier, even with a limited crew or solo sailing.

FULL INDIVIDUALIZATION: Your Yacht, Your Signature

Every LEGION-branded yacht can be fully personalized as it is crafted in close collaboration with its future owner at every construction stage, ensuring the vessel is tailored exactly to their wishes.

LYOFOOD SP. Z O.O.

25-636 Kielce, ul. Olszewskiego 21
mobile: (+48) 534 374 604
e-mail: kontakt@lyofood.com
www.lyofood.com

Supplying expeditions for over 25 years.

For over 25 years LYOFOOD has been supplying explorers, alpinists, sailors and adventurers all over the globe. Our meals have reached the highest mountains, crossed the biggest deserts and sailed the longest regattas.

We are proud that our food is the choice for many top outdoor athletes, including 4 times Ice Climbing World Champion - Ines Papert, one of the best rock climbers - Nina Caprez and admittedly one of the best ultra distance runners, Kilian Jornet.

Regatta and ocean expeditions experience

Through the years our products have been tested on long offshore expeditions by professional teams of sailors and kayakers. For the last few years our meals have been on board with many Volvo Ocean Race teams. The National Geographic Adventurer of the year - Aleksander Doba chose our products for his famous three solo Atlantic crossings. Currently Erwan le Lann set on a 4-year long adventure around the world on his boat Maewan. Tanguy de Lamotte, one of the best skippers, enjoys our products everytime he's off shore. Both are relaying on LYOFOOD products as do many sailors who appreciate high quality, tasty and natural food.

Ines Papert

Four time Ice Climbing World Champion Ines Papert and Mayan Smith-Gobat dining on the wall during climbing one of the most extreme alpine routes. "Riders on the storm" - Torres del Paine, Patagonia

Tanguy de Lamotte

Tanguy de Lamotte is a French solo sailor, who has taken part in some of the toughest offshore races in the world including the Mini Transat, the Transat Jacques Vabres, the Route du Rhum and the Vendée Globe.

What's inside & what's not

From the beginning we say NO to pesticides, preservatives, artificial additives, colorants - you will not find any of those inside LYOFOOD products. We are proud to cultivate some of the fruits and herbs on our own fields. Other fruits and herbs as well as vegetables come from farmers known to us personally. They are carefully verified to ensure that all our ingredients meet the highest quality standards. What you will find inside are genuine, natural ingredients.

How it is made

We stay away from industrial cooking. We do not mix pre cooked ingredients in big tubes. Our meals are always prepared in a restaurant just as they should be. The result is a fine taste of genuine homemade dish. After the meal has been cooked, it undergoes the freeze-drying process. We use exclusively this advanced technology to produce our meals with the best quality available. Freeze-drying allows to keep 98% of natural vitamins and nutrients intact in their natural whole food form.

Extra Safe

We are a food company, but also an innovative one - we run our own, small lab. To make sure our meals are safe in every aspect, they are checked twice in the in-house laboratory. Once - after being cooked and for a second time - after the freeze-drying process.

MARIGO CZARTER MAZURY

11-600 Węgorzewo, ul. Sztynort Duży 11
mobile: (+48) 691 612 066
www.marigo.pl

www.modelart.com.pl

Model-Art Sp. z o. o. - we build boats with passion.

Model-Art shipyard is a company with 23 years of experience in manufacturing "premium" yachts up to 12 meters in length for leading European brands.

We are a recognized manufacturer of tooling for the production of composite structures in manual, in-

fusion and injection technologies. Many years of experience in this field and modern technical and technological facilities put Model-Art among the leaders in composite technology and motor boat manufacturers in Europe.

With many years of experience

and highly specialized technical staff, we offer modern design solutions and the highest standards. We pay attention to every detail and adjust to the individual preferences of our clients.

We are proud that the boats produced at Model-Art are present all

over the world: from Scandinavia through all of Europe, USA, Canada, Japan and Australia. Changing trends and needs of our clients determine constant effort on development of our services & products as well as improvement of the quality.

MONGIRD YACHTS

80-259 Gdańsk, Obywatelska 2a
mobile: (+48) 598 485 311
e-mail: yachts@mongird.com
<https://yachts.mongird.com/>

Mongird Yachts was founded by Krzysztof Mongird, a titled sailor and water sports enthusiast. His success was also influenced by the long family tradition - his grandfather was a mechanic engineer, whereas his father was supervising the construction of El Bravo, the first most luxurious and biggest yacht in the world. Years of experience in constructing yachts and driving them in prestigious sport competitions, extensive knowledge and passion allow us to offer you only the best.

Mongird 25 is our first launch – a combination of classics and modernity. The motorboat is inspired by the 30's-60's of the 20th century, when high gloss wood and stainless steel were especially popular. We decided to introduce the exposed carbon fiber structure and used exquisite, luxurious materials. The smooth shape and

flush deck are additionally highlighted by the aggressive hull lines. The upscale and advanced functions of our motorboat (even in the standard option) will make every moment spent on the water truly unique. A wide range of additional equipment will make your cruise easier and guarantee an even better experience.

We won't try to force our vision - you can freely change the colors and equipment of the cabin. Our motorboat is easy to transport, exclusive, but at the same time affordable.

As a company that introduced an innovative product - a motorboat with a visible carbon fiber structure, we have the desire and appetite for continuing our development. That's why, following the trends, we star-

ted working on the electric version of our motorboat. Because of the carbon fiber we get a light hull. By adding a modern electric motor to this,

we are convinced that our product will be truly unique.

We build our yachts in accordance with the world standards, and our priority is the highest quality of the offered product.

NAVIGO BOATS, YACHTS & YACHTING

80-643 Gdańsk, ul. Przełom 24 / Marina Przełom
phone: (+48 58) 719 39 09
e-mail: contact@navigobyy.com
www.navigobyy.com

NAVIGO Boats, Yachts & Yachting is a Polish company from the largest seaside city in Poland - Gdańsk, with roots in a family business, which was created as a response to the demand for enthusiasts of sailing and motorboating sports. The most important services of Navigo as an international yacht broker is representative of producers, support for sellers or who want to buy new or used yachts or boats.

In 2023, Navigo obtained the status of an official dealer in Poland of Spanish RODMAN boats.

Cooperation with NAVIGO Boats, Yachts & Yachting will allow you to be confident about the quality of partnership in the sailing industry. The network of our partners in Europe and in the

world will give you access to a wide range of potential customers.

Here are the advantages of working with us:

Maximize the value of the boat you sell:

- Getting an attractive payment for a boat means one thing: the need

to access a wide range of buyers and effectively reach the most interested group.

Hassle-free transaction:

- NAVIGO as yacht brokers will not only find a suitable buyer for the boat you are selling, but will help ensure a hassle-free transaction that will leave both parties satisfied.

Assistance in the field of logistics and purchase financing:

- Thanks to sales experience, negotiations, boat transport organization and many other issues, we can take care of every aspect of the sale. Constant cooperation with financing entities ensures a more efficient process of obtaining funds

in the case of such a requirement.

New boats and yachts (representatives of manufacturers):

- high-quality partnership,
- reaching new markets and a new group of customers.
- Yacht broker (sales):
- marketing service and sales optimization,
- service of interested in purchasing,
- maximizing the value of the boat you sell.

Yacht broker (purchase):

- advice on choosing the right boat,
- purchase security,
- logistics support,
- assistance in obtaining financing,
- supporting processes after the purchase of a boat.

PHU NAWI

We carry out pilot and prototype projects. As a manufacturer of connectors, wiring harnesses and cables, we have a good understanding of the market for non-standard electronic components. We are able to import rare, uncommon components for our customers.

Our offer includes analysis of the project with preliminary pricing, preparation of a prototype or sample batch, and transition to mass production.

We specialize in single and multi-array harnesses combining a variety of components and assembly techniques. Arranging of harnesses is done manu-

ally using semi-finished products prepared automatically. The harnesses are tested using specialized equipment. A qualified staff enables the design and implementation of unique and specialized projects. Customers can also count on professional assistance in the development of new products.

We offer:

- Cutting, stripping and tinning of wires
- Marking of wires
- Crimping and crimping of contact elements
- Crimping of connector terminals
- Folding of bundles
- Other, according to individual needs, i.e. protection against breakage, abrasion

In our company we focus primarily on the quality of raw materials, semi-finished products and final products. Our advantage is timely production, tailored to individual customer needs, competitive prices and qualified staff taking care of high quality final product.

N Fun Yachting is created by Marek Stanczyk – multi-medallist in Polish National Sailing Championships, Winner of World Cup regattas in match racing and experienced sailor competing on all kinds of boats all over the world. In 2006 Marek established his first boat building business.

Using experience gained over many years of world class sailing he introduced a range of successful sailing and motor yachts. Boats built under Marek's supervision proved to have great nautical properties. In 2014 Marek established his professional N'fun Yachting team and began developing the N'Fun 30 Yacht. N'Fun 30 yachts are carefully hand laminated and built using only the highest quality components and materials. The N'Fun 30 is very adaptable in its use for day sailing, weekendening, regattas, club racing and sailing schools. It's created the from these 4 principles:

- Easy and fast sailing
- Comfortable sleeping space
- Flexibility in shallow waters
- Maximum cockpit space

Thanks to a lifting keel with a 550kg

bulb and low total weight the N'Fun 30 is very stable and easy to handle. Sailing the N'fun 30 is much easier than a typical 30 foot boat. At the same time the cabin is comfortable for a small crew to sleep in for a few days. The lifting keel has several advantages. It gives access to shallow bays, marinas and mooring fields with low and tidal water situations, as well as making transport much easier. The prioritization of the outdoor space resulted in a cockpit larger than on some 40 foot yachts.

For N'Fun Yachting to deliver a 'ready to sail perfect yacht', our team spends a lot of time with client. Together, we do yacht tuning, test sailing, training and regatta trials. We can coach client's team. Our world cup winning team is ready to support.

WE ARE A TEAM OF SPECIALISTS

We are a team of specialists from the tourism industry in various fields. We love water sports and sailing on motor yachts. We have been running a yacht charter company for many years and we have long been involved in building yachts to meet the needs and tastes of our clients. We have many years of experience in the yachting industry in Poland, Warmia and Mazury and abroad. We have experience in the tourism and water recreation industry, including yachting, in serving foreign clients, and we speak German and English fluently.

The goal set by the company's founders in 2016 was to create a modern charter yacht design that meets the criteria of a comprehensive offer, i.e. combining active recreation with comfortable accommodation on the water through the sale and charter of a modern yacht that meets high standards. When creating its yachts, the company pays

special attention to nature, designing units based on modern solutions.

NIKHEN AQUASUN 34 - INNOVATIVE YACHT WITH A MODERN DESIGN - AFTCAB AND SEDAN VERSIONS

NIKHEN AQUASUN 34 is the only innovative yacht intended for charter that combines the features of comfort and elegance and meets high requirements. The SEDAN with two comfortable cabins and an open roof in the cockpit (open sky) and in the AFTCAB version with a third cabin in the stern. The yacht has high-standard cabins and one or two bathrooms. The height in the cabins (185 cm) allows you to move and stay freely, which is rare on the Polish market of yachts intended for charter, where yachts with limited cabin comfort dominate.

NOMADREAM BY REINGARD DESIGN

90-514 Łódź Al. Kościuszki 59/61
mobile: (+48) 669 060 606
e-mail: contact@nomadream.com
www.nomadream.com

Company Reingard Design exists since 1992. After several decades of experience with design and construction the concept of house on water has been borne. In 2015 arose brand NOMADREAM – catamaran boats type WaterHome.

Our product is available in two main versions. FloatingHome i.e. drifting unit without nautical devices and engines. WaterHome i.e. fully equipped, independent vessel legitimise with the certificate CE as catamaran D category. Both units are available in four dimensions long 9,13,16,20 m. and wide 4.2 m. NOMADREAM is the year round living unit with high standard equipment and high thermal transmittance value. Full-size interiors with real kitchen, large bedroom and spacious bath-

room gives possibility to having rest by the water in conditions compared to those on the large marine units. NOMADREAM is equipped with the latest technologies devices supporting functioning of unit.

- effective solar system 2 kW
- electrical heating floor mats powered with solars
- Yamaha engine 60 horses
- large utility tanks (by 2000 ltr)
- Interior height 2.4 m
- large terraces, lower deck 20 m flybridge 20m
- equal level deck

The above advantages ensure unbounded comfort of yachting across inland waterways and creates entirely new segment in water tourism and hotel industry.

NOVOL is a leading European manufacturer of coating products for the automotive, industrial, construction, shipbuilding, and composite industries.

NOVOL's NAUTIC product line includes a wide selection of two-component assembly adhesives (based on polyesters, vinyl-esters and epoxy resins) for binding laminates and fixing reinforcement pieces, deck carlines and beams, as well as sandwich panelwork.

For over many years, NOVOL has been supporting the production of leading shipyards from Poland and abroad. Supplied assembly adhesives are characterized by high quality (ISO 9001, ISO 14001 standard), strength and resistance to overload resulting from the use of boats and yachts. The NAUTIC line also fea-

tures putties for polyester mould repairs and modelling, a liquid laminate solution, and STP polymer compounds.

NOVOL is also the manufacturer of the CREATOR tooling system, designed for producing large format models using CNC machine tools and mould protections products.

O'boats - a fresh perspective on navigating through the seas. Designed for independent minds and rebellious souls, for people defying the ordinary.

We are proud to present the O'boat o'550. At the very beginning its journey on the market it has been recognized and nominated for the Best of Boats 2023 Award.

Our goal was clear – to create a perfect balance between practicality and finesse. O'550 is lightweight, subtle, yet durable. It is made of aluminum with the utmost care for detail. We've equipped it

with the cutting-edge technology from Garmin. Our boat features comfortable and easy cruising enhanced by: convertible couches, handy refrigerator, audio equipment, inductive phone charger, cruise control, bow thruster, Zipwake. These are just a few of our ideas to make your cruise an outmat-
ching adventure. So... get on board and let the fun begin!

OCEAN SAILS STANISŁAW SAWKO

Ocean Sails Sailing Team - The sailmakers.

The production hall of our company is situated In Kamienica Królewska, around 60 km from air port In Gdańsk In Poland.

We are producer of sails even for the smallest yachts up to the biggest offshore racers.

Our specialization is both cruising and racing version of sails.

The highest quality of our sails becomes from rich regatta experience of the founder of our company Mr. Stanislaw Sawko.

The regatta know how was brought to perfection during the competition against Prince Harald , actual King of Norway and Juan Carlos King of Spain . This knowledge corresponds with high quality of our sails which are the main motor for sailing boats.

To the most important achievements of the founder of our company belong:

- A dozen or so titles of the Polish Champion,
- Wining of qualification to the Olympics Games in Los Angeles in 1984(unfortunately it was boycott form the political reasons by the eastern countries).
- Three titles of the World Champion in Micro Class
- Taking parts in first in polish history professional sailing team of the sea Big Bank racer.

- Being the helmsman and tactic of MK Café one tonner yacht in years 1990 -1995 ,including winning the international, prestige regatta – Kiel Week and Flensburg Week.

Ocean Sails products sail across seas and oceans all over the world, even in ice of Antarctic provided satisfaction for our clients.

We send our sails to the European countries and far away from our continent for example to the USA, Canada, Brasil, Australia, Japan Russia and over the Ural too.

Solid taking part in sailing regatta in our country and abroad is continu-

ous confrontation with all the best companies all over the world.

The highest technology (our sewing machine . projecting and cutting systems which use the laser) allows for achieving the highs world quality standards.

Appreciating the sailing as a school of characters for young sailors we are sponsor of several sailing events in our local school sport Club UKS Wiking in Kamienica Królewska.

See you on the beautiful lake in Kamienica Królewska.

mobile: (+48) 798 050 897

e-mail: biuro@odysseya.com

www.odysseya.com

Our adventure with sailing and yachting began over 20 years ago. At that time, we associated inland and open waters with leisure, vacation, and good fun. At the very beginning of the road none of us imagined that we would become a manufacturer of exclusive vessels ourselves. With time, however, this moment became closer and closer to us.

A dozen years later, we started operating as a charter provider in Masurian Lake District under PerfectSail brand. In 2016 we began building yachts on a larger scale as Odysseya Yachts. At that time, we produced them both for our charter fleet and for external customers. We built the first units based on hulls from top Polish manufacturers. Over time, the experience and skills of our

team were recognized by the industry and numerous orders started coming in. This necessitated a move to larger production facility and the development of a professional system of yacht production and assembly. We recognized a niche in the motor yachts space - offered vessels were poorly equipped and lacked versatility, uniqueness, and comfort equipment.... Striving to de-

velop our charter fleet, we looked for a yacht and hull manufacturer that would meet our and our customers' expectations. This is how our Platinum 35 was created - the first Polish semi-planning yacht with a saloon cockpit. However, we felt it is still not perfect. We knew that it is a yacht with great potential, which, with the implementation of appropriate solutions, has

a chance to stand out on the market. This led to the presentation of our flagship model at the Poland Boat Show - Platinum 40. Both Platinum 35 and Platinum 40 joined charter fleets and found many private owners in Poland and around Europe. Being close to perfection in motor yachts segment - we are designing a sail yacht which will be presented in 2024.

OPENSEA SP. Z O.O.

81-345 Gdynia, Jana Pawła II nr 5
mobile: (+48) 787 920 470
e-mail: info@opensea.com.pl
www.opensea.com.pl

The Open Sea by Ad company was created out of a passion for motorboats, water sports and a lifestyle based on freedom. We work with leading equipment manufacturers such as Parker and Kawasaki. We represent brands based on quality and tradition. We combine it with modernity and the development of the culture of water sports.

Main fields of activity:

- Official dealer of Parker Poland boats
- Official Kawasaki Jet Ski dealer
- Official 3D Tender reseller on Polish market
- Authorized Mercury engine service
- Official dealer of Mercury engines
- Sale of new and used motor boats

We offer warranty and post-warranty service for Parker boats, Mercury engines and Kawasaki water scooters. We organize professional photo and image sessions on board our units. We organize unforgettable cruises

around the Gdańsk Bay, both as events for companies, as well as individual receptions or parties.

Our goal is to provide our clients with the best comprehensive service. From the moment of choosing the perfect water equipment tailored to your needs, through the selection of accessories and decor in detail, to providing service after purchase.

Thanks to many years of experience as users of motor boats, we perfectly understand the needs of our customers and are able to advise from the consumer's point of view. We also want to inspire new people to spend time on the water and to develop the Polish motor boating culture

OPTICUP PPH JERZY MIŚKÓW

43-340 Kozy, ul. Choinkowa 22
mobile: (+48) 601 453 077
e-mail: opticup@opticup.com.pl
www.opticup.com.pl

The company was founded in 1991 in Gliwice. The main course of action was the licensed production of Optimist Class boats and the construction of composite moulds on a polyester and epoxy basis. The second significant direction was the activity in the field of sailing regatta training conducted at the Water Sports Training Center at Dzierżno Lake. The next years of activity were focused on a new business profile closely related to the composite industry. Currently, the company brings together experts who work in each of the organized teams to meet the individual needs of composite product's manufacturers.

The range of technological support includes the following issues:

- scientific and research descriptions and technical opinions.
- environmental protection issues in composite manufacturing plants.
- optimization of composite production processes (raw materials, technology, machines).
- installation and startup machines for the production of polymer composites.

- design of composite structures.
 - design of technological processes for the production of composites by selected methods.
 - support for technological enterprises in the implementation of projects related to composites.
 - technical training for employees.
- Using the rights it possesses, the company also performs the tasks of technical inspector and measurer of class yachts of the Polish Yachting Association.

OSTRÓDA YACHT SP. Z O.O.

Otago Yacht Agency
With over 30 years of experience, our only goal is to provide you with great sailing vacations to incredible destinations!
We ensure the high quality charter services tailored to the type of leisure and to the size of the crew.

We offer sailing yachts from many different bases spread across the globe – from the most popular, such as Croatia, Greece, Turkey, Italy, Spain, Canary Islands, Cape Verde Islands, the Azores, the Caribbean, Belize, Cuba, the Bahamas and Canada (Vancouver), to northern destinations, such as Norway, Sweden and Finland, or more exotic ones, as Malaysia, Thailand, the Seychelles, Australia, New Caledonia, Tonga, and Tahiti. More adrenaline will be ensured by our selection of motor yachts, which allow for swift

visits to luxury resorts on the Spanish Majorca and the French Cote d'Azur, or modern Adriatic marinas including Porto Montenegro.

Our vast selection of private and luxury yachts with full service and catering will ensure a carefree family holiday. We can design incentive tours for companies and groups of all sizes on the wooden tall ships as well on the comfortable gullets. To connoisseurs of larger vessels, we recommend motor cruisers of luxury suite standard which can take you not only to ports in Europe and the Caribbean, but also to Amazonia!

We were the first agency in Poland to offer holidays on river and canal boats of Europe (France, Germany, the

Netherlands, Belgium, Italy, Spain, the Czech Republic, Poland, Scotland, England, and Ireland). What is important, it does not require a license, training on-site. In the new season, the offer of canal boats was extended to include bases in Portugal and Sweden. Each cruise is organized individually (including flights, hotels, tour suggestions, land trips). We may ensure our clients with the most interesting offers on the market even up to 50 per cent discount sometime. Wide insurance coverage is offered for each trip including travel health insurance, deposit insurance and civil liability insurance for skippers.

Feel free to contact us in English, German, French or Polish.

PACYFIC YACHT UPHOLSTERY

14-100 Ostróda, ul. Demokracji 7
mobile: (+48) 535 102 677, 512 227 611
e-mail: info@pacyfic.eu
www.pacyfic.eu

In Pacyfic we manufacture yacht upholstery and pilot seats, offering individual service with practical solutions for most applications.

We are proud to lay claim to being the first choice for many a client and business partner, and are market-leaders in Europe, while continuing to expand; indeed, our products may be found in almost every exhibition mainland and overseas.

PANTAENIUS YACHT INSURANCE

Branch Office Poland
80-802 Gdańsk, ul. Gradowa 11
phone: (+48 58) 355 82 50
e-mail: info@pantaenius.pl
www.pantaenius.pl

Pantaenius is Europe's leading provider of boat, yacht and jetski insurances. Whatever happens to your yacht and wherever you are in the world, Pantaenius knows the places and people who can help. We have our own claims department that is not outsourced and can be reached at anytime!

We offer the insurance policies for yacht owners designed to cover common risks in yachting:

Hull Insurance - All risk policy Including damages to the vessel resulting from theft, fire, force majeure, sinking, grounding, collision or piracy.

Third Party Liability Insurance – cov-

ers the damages that the owner, guests or crew have caused against a third party in conjunction with the use of the vessel, including water sports activities or diving for guests.

Personal Accident Insurance – covers financial repercussions from accidents resulting in death or permanent dis-

ability for the vessel owner, the unpaid skipper and crew.

War, Strike and Confiscation Insurance - for several cruising areas we recommend the complementary war, strike and confiscation insurance for specific risks that arise from political contexts.

Total Loss Insurance – covers the total loss of the vessel as a result of accident, fire, lightning, force majeure, or theft. Pantaenius also offers insurance solutions for charter trips available separately or as a combination of several insurance products:

Deposit insurance: Covers the full or partial retention of the security deposit for the boat.

Skipper Liability – in many options - from private one trip insurance to professional skipper's yearly cover against damages which occur during the use of another's yacht. The cover takes effect when the yacht's own liability insurance cannot be applied.

Travel health insurance: Protects skipper and crew in the event of illness and covers repatriation.

Accident insurance: Protects skipper and crew in the event of disability or death due to an accident.

Trip cancellation insurance: Reimburses contractually owed cancellation costs for the charter trip in the event of cancellation.

PARKER

PARKER POLAND SP. Z O. O.

05-152 Częstków Polski, ul. 30 Firmowa,
phone: (+48 22) 785 11 11
fax: (+ 48 22) 785 09 99
e-mail: parker@parker.com.pl
www.parker.com.pl, www.parkerpoland.com

Parker Poland Sp. z o.o. has an enviable worldwide reputation as one of the major producers of RIBs (Rigid Inflatable Boats) and GRP boats in Poland.

It is accredited with ISO 9001:2000 and has supplied large numbers of RIBs to the quality-conscious commercial market; including to Special Forces, Anti-terrorist Units, Army, Navy, Fishery Protection, Customs, Border Guards, Police, Fire Departments, Coast Guards and SAR organizations. Parker now also builds a new range of GRP 'Pêche Promenade' sports fishing boats: the very successful Parker 660 Pilothouse, Parker 660 Weekend, Parker 770 Weekend, Parker 800 Weekend, Parker 800 Weekend Twin Cabrio and the Parker 800 Pilothouse. To keep pace with growing demand, Parker moved to its purpose built facilities in 2005 and has continued to

expand activity. At present the Czo-snow site covers 10,000 m². (including show room, service centre and spare parts warehouse). A new manufacturing hall and warehouse at the boat yard in Ostroda were completed in 2013. RTM and infusion techniques are used, and only the best materials go into Parker hulls (which are manually laminated). Parker also uses computer

controlled 5 axis milling machinery to manufacture its plugs and tooling, ensuring maximum precision. There's an indoor tank for full pre-delivery testing of all boats. And the ongoing successful supply of Parker boats to rescue services and other professionals both in Poland and abroad provides undeniable proof of its boats' quality and reliability.

PEM Usługi Wielobranżowe Zbigniew Mulawa was founded in 1995.

We are a Polish enterprise producing blocks (single, fiddle, serial, static, feedback, board blocks) for textile and steel lines, belaying cleats, mainsheet cars, rails, tackle boxes, textolite blocks, boom vang, boom tips, reducing bushings, storm rail posts, rollers and other accessories for inland and sea yachts. Our products are made of high quality acetal, resistant to deformation, prolonged exposure to high and low temperatures, weather conditions and mechanical factors. The metal parts are made of polished acid-resistant 316L and 304 steel and of high quality PA-6 and PA-11 aluminium. Our products do not need maintenance (at the end of the season it is advisable to wash them in fresh water), and their high durability,

functionality, as well as competitive prices and fast delivery from the date of order, make our products attractive to many buyers; the products enjoy widespread recognition

among our customers in Poland and abroad. To meet market demands and needs of our customers, we also make blocks on demand.

The Polish Yachting Association is a Polish national sport association. Its activities cover all forms of sailing. The Association organizes sport competitions in Poland. It represents Polish yachting in international yachting associations. It selects the representatives of Poland for EUROPE and WORLD championships, OLYMPIC GAMES and equivalent events.

The Association trains Polish yachters for yachtmaster certificates, authorising them to sail on all basins; it trains sailing instructors and issues authorisation to conduct trainings and exams; it conducts yachting certification exams; under the authorisation from the state, it issues yachting certificates and register yachts of up to 24 m hull length; it trains technical inspectors, surveyors, sport judges, and issues the relevant licenses for them; it makes technical checks of sea yachts of up to 15 m hull length and of inland yachts, when commissioned by their owners. Issues safety certificates – seaworthiness certificates.

In recent years, the Polish Yachting Association has undergone a series of changes, becoming a modern organization that meets global standards. Initiatives such as the Good Governance Code, sustainable development policy, digitizing the office, equal treatment, promoting sailing among children and youth have been implemented. In 2024, the Polish Sailing Association will celebrate its centenary. The year 2024 also coincides with the Paris 2024 Olympic Games. In this important period, the Polish Sailing Association enters as an organization that enjoys a high level of trust within the community.

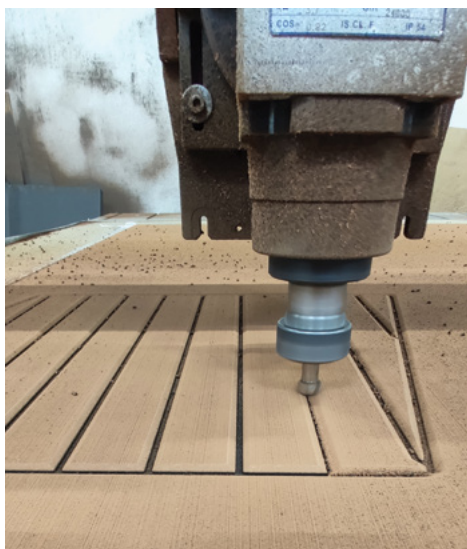

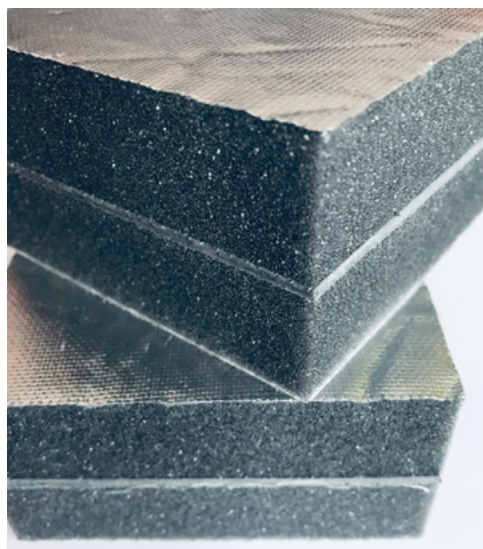

PonSil provides soundproofing foams and technical consultancy in soundproofing solutions for:

- motor boats and yachts,
- equipment and machinery,
- sound barriers.

We offer products made of melamine foam (BASF Basotect), hydrophobic foam and recycled foam, as well as composite materials and sound-absorbing fabrics.

In order to meet the requirements of

our customers, each product can be cut to the desired size to facilitate the assembly process. Our products are available in the following versions: without adhesive, with single- or double-sided adhesive. What makes our products stand out is their ability to permanently bind different types of foams and surfaces.

42DS, Delphia 40.3, Elan GT5, Jeanneau 39i, Hanse 348, Hanse 350

Our team helps to plan your sailing holidays in the Baltic Sea and provides a technical support whenever you would require it.

Discover with us the sweetest sea in the world.

PRO AIR

81-571 Gdynia, Ul. Chwaszczyńska 172
mobile: (+48) 502 635 216
e-mail: kontakt@jacht2020.pl
e-mail: proair@proair.pl
www.jacht2020.pl, www.proair.pl

The exclusive manufacturer of Yacht 2020 is the Pro Air. Our yacht was created out love and passion for sailing. A yacht for everyone, enable amateur and sport sailing. In the season of 2021, yachts both appear on inland and coastal waters by participating in regattas, leagues, training sailing and cruises.

Three yacht's models conform to all safety standards and meet consumer's requirements and provide amazing fun on the water.

The models of the hull, centerboard and rudder are made on a CNC milling machine. A mold made of good materials, with wide flanges, typically adapted to the resin infusion process. The hull is made of polyester-glass laminate on a foam spacer, which gives displacement even when the chambers are completely flooded. The production of our yacht is based on the infusion process. Thanks to this, each layer is perfectly pressed against each other.

REGULAR MODEL

The perfect solution for amateur sailing. All of the yachts have hull with fittings, basic equipment, masting, a set of two sails (mainsail and jib), full rigging, rudder and new model of the centreboard, which thanks to its weight (130 kg) ensures stability even in strong wind conditions. Additionally, yacht's construction allows the installation of an outboard engine.

SPORT Models in which the length of the mast, the surface of the sails and their number change. Thanks to the third sail (gennaker or spinnaker) the yacht increases its speed significantly and fly running downwind. The yachts are intended for sports sailing.

SAFETY

The yacht's construction, defined by the common criteria of the European ISO Standards, allows for the freedom of sailing without any external belaying. The yacht has a design category C (suitable for sailing with steady wind force up to 6° B, gusts of wind up to 33 kts, and waves of up to 2 m. high.)

MOBILITY

Thanks to its weight and construction, the yacht can be loaded by its crew on a shorelander trailer and transported by a passenger car on public roads.

SAILING WATERS

Yacht 2020 is adapted for sailing on inland and coastal sea waters.

CREW

Sailing on the yacht is possible with a crew of 3 to 6 people.

REPRESSER YACHTS SP. Z O.O.

50-001 Wrocław, ul. Kościeżyńska 9

www.represser.com

Represser Yachts are designed for people who are unique, live to the fullest, expect highest quality and are always hungry for new experiences.

These are yachts for those who want to be original and special, just like the people and things they surround themselves with.

Uniqueness. Individualism. Art. We always strive to develop technologies which increase resistance of our yachts; we enhance our production technologies and improve function-

ality while continuously perfecting our concepts.

Represser 30 is a unique, individual product.

It is a yacht for people who want and achieve more than others, which is why we follow a concept that provides space for hobbies, relaxation and comfort.

Represser 30 is a unique, one-of-a-kind yacht on the European market. This yacht perfectly complements the contrast between the speed of life and the blue of the water which soothes the senses after a hard day. These were our priorities while cre-

ating the Represser brand. With our products, nothing goes untested. We keep modifying them as long and as intensely as needed to achieve our ambitious goal. Perfection in every metre.

www.boat.com.pl

We are one of the first yacht yards in Poland building yachts of steel and aluminium according to the individual wishes of our clients.

We execute orders for sailing and motor yachts between 30 and 200 feet in length. For some time now, our main production has been superyachts, finished according to all wishes of our clients. We have been present on the market for 35 years now and we construct designs of well-known constructors, such as Van de Stadt, Reinke, Beiderbeck, Larionov. We take advantage of the latest available technological and material innovations. We construct boats from scratch and we can work on any stage of finishing. We specialise in producing fast seagoing yachts based on hulls from lightest and most durable aluminium alloys and stainless steel.

We take orders for fully finished and equipped yachts from hull, masts and rigging to interior finishing according to in-house designs and the clients' own designs. In interior finishing, we use technologies which allow for high durability while retaining low weight, based on composite materials and reinforced sandwich plywood. As one of only few compa-

nies, we have the technology to produce sails for the largest sail ships, such as the Kruzensztern and the Sedov. We conduct all types of repairs and renovations of hull and interior. We produce and install masts and rigging. We also prepare yachts for ocean voyages.

Trust us and enjoy infallible technology.

We offer the greatest selection of yachts, including yachts available without licence, luxurious vessels with heating and stationary Diesel engines, easy online reservation, kind and professional customer service in the port, comprehensive insurance, competitive prices, a broad selection of discounts and promotions, no hidden fees, One Way charters (Piękna Góra – Ruciane Nida, Ruciane Nida – Piękna Góra). Additionally, we provide free fuel for each charter: 5 litres for petrol engines, 10 litres for Diesel engines. We also offer berths for yachts and motor boats of individual clients, sanitary equip-

ment, seasonal berths, wintering, slip, crane, fuel, gas and gas cylinders, electricity at the quay, round-the-clock guarded car park.

Our Sailor port is located in Piękna Góra near Giżycko, on the trail of the

Masurian Lakes, on the Kisajno lake. Wireless Internet access is available everywhere in the port.

We also offer foreign charters, e.g. Croatia, Greece, the Balears, Canary Islands, Spain, Portugal.

SAXDOR

SAXDOR SHIPYARD SP. Z O.O.

19-300 Elk, Stoczniowa 1
e-mail: office@saxdor.com

Founded in 2019 out of the pencil of the internationally recognized boating industry maestro Sakari Mattila, Saxdor is the fastest-growing luxury brand in Europe.

Saxdor Shipyard is located in Elk, Poland. All boats are built with the highest standards with attention to safety by using cutting-edge technologies. The Saxdor team possesses the expertise, experience, and advanced technology required to construct the highest-quality and most comfortable vessels. Our first year was a massive success with three highly valued awards and nominations: Best of Boat Award 2020, Eu-

ropean Power Boat of the year 2021, and Motor Boat Award 2021.

Great things are never made in isolation, and Saxdor is fortunate to employ some of the best craftsmanship and engineers in the industry at our shipyard. We also respect the expertise of specialists in other disciplines, which is why we collaborate with J&J, VOM Creations, naval architects and specialist equipment manufacturers.

processes such as production, sales, payments are planned and executed by a SAP system.

Sea-Line® distributes in over 30 countries around the world. The Certification of Authorized Economic Operator AEO enables for fast and easy export. The Sea-Line® brand provides marketing and technical support for distributors as well as end-users.

SEASHOPPER We give old sails a second life. We create unique bags full of memories of the seas.

That is why we are constantly looking for sails which experienced many adventures. We choose the appropriate ones, clean them and give “a second life” in the form of bags. We are looking for contact with charter companies, sailing clubs and sailors who would like to give us their old sails and turn them into new bags. We cooperate with people and companies that value uniqueness and

sustainable production. Within each bag we place a stamp with geographic coordinates that indicate where a sail spent most of its life. At the client’s request, we personalize the bag and provide a certificate of origin.

Thinking about sailors and women who love the sea, we have created a unique SEASHOPPER handbag made of 100% recycled sails. These light and durable bags made of sails, wind and a handful of memories are made by hands in Poland. In a small manufacture in Poznań, using components produced exclusively in Europe, we create real unique items for you.

You may find the SEASHOPPER handbags on our website www.seashopper.eu or in a cozy showroom in Poznan. They are also available in boutiques in Europe, Japan, South Korea and in the USA.

SEATEC / SECO SP. Z O.O.

95-010 Stryków, Tymianka 99
phone: (+48 42) 206 80 70
fax: (+ 48 42) 206 80 79
e-mail: info@seatec.pl
www.seatec.pl

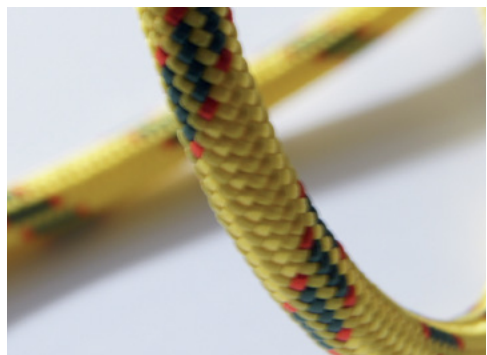

Waves, wind, weather – only on water do all these forces of nature meet. A group of braiding specialists and sailing enthusiasts decided to master them, creating the line brand Seatec.

In the Seatec project, we have put all the best ingredients we had.

In the production facility in Stryków, near the A1/A2 motorway junction, we manufacture various types of sheets, halyards and mooring lines.

More than 180 years of experience of our German shareholders in the production of braid products, our established production know-how and the fact that we have our own technological department allow us to constantly develop and improve the functional properties of the Seatec lines. We continue to design new collections of lines and systematically expand our product offer.

We use quality yarns: Dyneema, Polyester HT, Polyester Staple Fiber; We conduct a clear policy of B2B distribution – we sell our lines exclusively to producers of yachts and distributors of sailing equipment. For larger orders, we produce lines according to the clients' designs. In order to ensure the exposition of our lines, we also offer aesthetic stands with boards displaying the logo of our brand.

Our clients can count on the full attention of a team of dedicated staff, including business and technical advisers working in the company seat, advisers working with the clients, product managers. We consider quality the overriding value

in relation to client satisfaction. At each stage of production, we observe the procedures specified in the Quality Policy and confirmed with the ISO 9001:2008 certificate issued by the BSI.

Seatec Design offers a modern style, well suited to the latest trends in sailing. We want our lines to be more than just practical, to be aesthetical and add to the looks of yachts.

We invite distributors of rigging equipment and yacht yards to cooperate with us. Upon request, we will send you samples of our lines along with a catalogue of our products. We would also like to encourage everyone to visit our website at: www.seatec.pl.

PERFORMANCE SAILBOATS

SOBUSIAK YACHT YARD

92-318 Łódź, Al. Piłsudskiego 141
mobile: (+48) 509 866 987
e-mail: sobusiak@yacht-focus.pl
www.yacht-focus.pl

Sobusiak Yacht Yard – producer of performance boats made to deliver an unique sailing experience since 2005. Be a bit faster than your neighbour!

The Focus 750 Performance was created for sailors looking for a unique, modern but functional daily cruiser — racer for short-handed crews.

- TRAILABLE & SLIP EASILY – Low weight and 2.50 m road width allows for easy transport and launch.
- CLUB REGATTA or FAST&FUN SAILING – You don't need to chan-

ge the boat to have a fun during the regatta competition.

- SAILOR FRIENDLY – Simple to own and easy-to-handle. The sailboat is easy handling both on the water and also during the logistic operations. Lifting keel let you explore shallow waters. Chined hull improves directional stability and makes the boat incredibly forgiving.

The Focus 30 is a stunning cruiser. Designed to be fast but comfortable and safe. She allows comfortable accommodation for 6 people.

The high volume, powerful hull means that the Focus 30 can carry the accom-

modations and gear associated with a modern performance cruising boat. This option-friendly boat is fully customizable to accommodate the owner's type of sailing.

www.tmspider.pl

'SPIDER Budowa i Remonty Jachtów' was established in 1994. We specialise in the construction and renovation of yachts according to the shipowners' wishes.

We have completed reconstructions of wooden yachts of the types OPAL, VEGA, REKIN, TAURUS, and others. We have constructed, among others, yachts of the following types: REJA 35, JANMOR 45, JANMOR 33, JANMOR 31, SASANKA 660, TANGO FAMILY. In 2013, we constructed the steel sail yacht Lady Dana 44, which has completed the Northern Sea Route for the first time in the history of Polish sailing. We employ highly skilled boat builders. The owner of the company, Tomasz Malinowski (since 1978 employed in the Conrad Shipyard), guarantees that the ordered yacht will be constructed in compliance with good shipbuilding practice.

The company started its activity in 1983, and since 1999 it has been operating as a SPORTIS Joint Stock company

SPORTIS S.A. specializes in the design, production, service and repair of motor boats and other products made of GRP and coated fabrics as well as steel and aluminum outfitting.

SPORTIS S.A. is a leading Polish manufacturer of hybrid RIB boats. The company delivers boats mainly to state services and organizations, as well as other institutional and individual recipients. A significant part of the recipients are foreign customers (e.g. Denmark, Norway, Israel).

Basic scope of activity

1. Design and production of motor boats

- RIB boats for professional and special purposes (especially for the Army, Border Guard, Police, WOPR, sports organizations) - up to 12.5 m long, with both open deck and cabin versions,

- RIB type boats for tourist and recreational purposes, RIB type - length 3.10 ÷ 8.30 m,
- RIB USV - 5.7 m,
- Inflatable boats - 3.1 ÷ 5.7 m.

The boats have the required certificates issued by the Classification Societies (mainly PRS).

A detailed offer is cataloged, with the possibility of adapting it to individual customer requirements.

2. Boat repair and service

- Comprehensive repairs and renovations of boats as well as service of outboard and stationary engines.

3. Equipment and accessories

- Life jackets and medical vests,
- Fishing, canoe and windsurfing vests,
- Buoyancy aids,
- Sailing clothes: storm jackets, soft-shell jackets,

- Sewing services.

For over 30 years, SPORTIS S.A. is a leading manufacturer of life jackets and safety equipment in Poland.

Certificates and licenses

1. Quality Management System

- Certificate No. 1256 / S - for compliance with the requirements of ISO 9001: 2015,
- Certificate No. 1256 / A - for compliance with the requirements of AQAP 2110: 2016,
- Certificate No. 1256 / W - for com-

pliance with the requirements of the Internal Control System.

2. NATO Commercial and Government Entity Code No. 0478H;

3. PRS Approval Certificate No. KI / 06/710357 for:

- manufacturing of yachts and motor boats from polyester-glass laminate, up to 15 m of length,
- manufacturing of products from polyester-glass laminate/coated fabrics, which are components for the production of yachts and boats.

mobile: (+48) 790 450 009
stillo@stillo-yacht.com
www. stillo-yachts.com

The Stillo Yachts brand was created as a part of the cooperation of two experienced companies in the sailing and motorboat industry and Arca Yacht, a company above with twenty years of experience in manufacturing and chartering in the Great Masurian Lakes.

Sharing our many years of experience, we have developed a yacht project that is ideal as an alternative for motor boaters and sailors who want to experience a more convenient and economical form of rest.

The Stillo 30 yacht is a unique proposal for all water sportsmen in the segment yachts up to 30 feet in length.

Here you will find all the amenities of the Premium class. A wide range of configuration and personalization options

equipment will meet even the most demanding expectations demanding customers. You do not need a motorboat license to drive a yacht. Stillo 30 is an elegant, efficient yacht, and at the same time a comfortable houseboat.

In 2022 we start new chapter in company "slide motorboats" our proposal is STILLO 8.0 DC family day cruiser boat which have all solution for premium motorboats. More info you can find on our website.

GROUPE BENETEAU

STOCZNIA JACHTOWA DELPHIA SP. Z O.O.

19-400 Olecko, ul. Kościuszki 63
phone: (+48 87) 520 74 00
e-mail: delphiayachts@delphiayachts.pl
www.delphiayachts.com

Nestled in the heart of Masurian lake region, Delphia has been a pioneer in boat manufacturing for over 30 years.

At Delphia, boats are built for those who love slow and quiet cruises where they can fully connect with friends, family and with nature. With a strong belief that time has become the most valuable resource in anybody's busy life,

Delphia's boats are designed to help owners to get the most out of them while creating unforgettable experiences respecting nature.

Unveiled in March 2022, Delphia 11 is its first all-electric real estate on inland

waters. In this mindset, at Delphia, the fabrics are made from recycled materials, as far as possible.

The boats are equipped to charge e-bike directly on board and take a spin on land.

While pushing electrical solutions, Delphia offers different types of propulsions.

The collection has three cruising boats each including different designs for any mindful cruises.

SUNREEF YACHTS

80-718 Gdansk, Tarcice 6
phone: (+48 58) 769 77 77
e-mail: info@sunreef-yachts.com
www.sunreef-yachts.com

Established in the port city of Gdansk in 2002 by French businessman Francis Lapp, Sunreef Yachts is a pioneering shipyard specializing in the design and construction of fully-customized luxury catamarans and multihull superyachts.

Innovation, sustainability and excellent craft are the very core of the Sunreef Yachts brand. The shipyard's family of customers includes superstar athlete Rafael Nadal as well as Formula 1 champions Fernando Alonso and Nico Rosberg among a vast clientele across the globe.

Catamaran Expertise

Sunreef Yachts has all the knowledge, experience and facilities required to build top quality composite units, using the most advanced technologies available in the shipbuilding industry. Housed in purpose-adapted halls, and boasting a highly developed in-

frastructure with all the necessary workshops and specialists along with direct access to the waterways of the Gdansk port and the Baltic Sea, it ensures excellent project management and workforce coordination. Key to the shipyard's success is undoubtedly its niche expertise, integrated in-house capabilities with all stages of design and manufacturing completed on premise, tailor-made finishes for each client, impeccable quality, and an ever-evolving yacht range thanks to a commitment to innovation. To provide owners with a full range of services, Sunreef Yachts also has its own charter office, Sunreef Yachts Charter, Yacht Management and technical service.

Sunreef Yachts Eco

Questing for a more environmentally responsible cruising experience, Sunreef Yachts marked a new chapter in its history. The shipyard developed a new

range of luxury Eco catamarans. The Sunreef Yachts Eco range is a range of eco-responsible sailing and power luxury catamarans. The shipyard combines electric propulsion, smart energy management, ultramodern solar panels and ethically-sourced finishing materials for a more sustainable yachting experience.

2022 was a very special year for the company, as Sunreef Yachts celebrated the company's 20th anniversary. The shipyard has been revolutionizing the yachting world for two notable decades and aims to continue to do so by shifting the minds of superyacht owners around the world in the direction of eco-innovation. The company unveiled two revolutionary concepts - Sunreef 43M Eco superyacht – the world's biggest electric leisure catamaran and a ground-breaking hydrogen power and electric propulsion yacht project.

mobile: (+48) 534 201 079
e-mail: m.skorkiewicz@techno-lab.com.pl
www.technolab-ms.com

TechnoLab is a professional shipyard specializing in production of motorboats and yachts. Caring about quality is our primary goal, which leads to customer satisfaction.

With a well-organized technical structure and experienced team, we are able to produce: plugs and molds, laminate parts and complete boats in the highest quality. Every process is conducted in-house: design, construction, lamination, mold shop, assembly, testing and quality control. TechnoLab incorporates fundamental yacht manufacturing equipment and systems, including important testing equipment as well as our 5 axis router and CNC

milling department ,which ensures the best and most accurate molds possible. We create molds that are perfectly symmetrical and remarkably consistent. We are open to new cooperation. Feel free to contact us.

TECHNO MARINE SP. Z O. O.

www.technomarine.pl

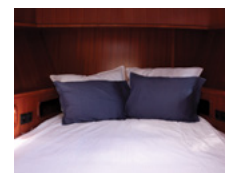

Techno Marine is producer of leisure and professional boats from 5 till 20 meters on individual order.

We offer offshore and marine yachts, motor boats, sloop boats, RHIB boats, passenger ships... and not only. The boats produced by Techno Marine are not constrained by construction material, since we produce hull in steel, aluminium, composite and mixed construction. In more demanding products, we use high modulus laminates.

The location of the production facility in Malbork, with direct access to the river, allows for easy transport of larger vessel by the water way Wisła-Nogat-Szkarpawa to the ports in Gdynia and Gdańsk. Furthermore, the close proximity of a navigable body of water allows us to test and check every boat in action.

Techno Marine works closely with the largest producers and suppliers of electronic and navigation equipment, as well as propulsion systems. Our offer includes wide type of vessel and modular construction allows for virtually limitless arrangement of their deck, seating, consoles etc.

TES YACHT SP. Z O.O.

Welcome to TES YACHT family of sailboats and motorboats. We have almost 40 years of experience!

The company was founded in 1980 by passionate designer and builder Tomasz Siwik. Today, in the new business model, we continue designing and producing of sailboats and motorboats. All our vessels are designed to satisfy the needs of the most demanding cruising sailors.

As a result of experience in designing, TES YACHT always focus on aspects such as: functionality, ergonomics and seaworthiness. Our clients value

us for the design and quality! The exceptional water handling, speed and spacious cabin, put TES yachts in the category of fast cruisers. All boats are trailerable with the swing centerboard. The keel versions for all models are available.

The family of TES YACHT consists of TES Dreamer 32, TES Magnam 28, TES 246 Versus* NEW, TES 678/720 BT, TES 550 Master, TES 393 Illuminatus* - NEW motorboat cruiser.

The longest, Dreamer 32, provides maximum of comfort and safety for sailors, during long distance cruises. The alternative for Dreamer 32 is Magnam 28, a little bit smaller, but still as fast and comfortable yacht in a modern design. If you appreciate unique style, comfort and speed you should choose a new model of TES 246 Versus with unique hull design. All those yachts are suitable for long

cruises on inland waters as well as on sea (CE "B" category). Our offer closes TES 393 Illuminatus* - NEW very comfortable motorboat cruiser with an excellent nautical performance, for long cruising trips. To learn more about all available models please visit our web site: www.tes-yacht.pl

**TES is the style and the quality
- you can fulfil your dreams**

TEZANA

www.solid-boats.eu

Thor Solid Boats – a Polish producer of aluminum fishing boats.

Our company was created out of passion and love for fishing. We connected our experience and knowledge to create ideal fishing boats which we had always looked for, unsuccessfully, ourselves. We craft these boats according to the

maxim: 'the strong thing – no compromises.' We are aware of the fact that each of us has own preferences. That is why, we get ahead our customers' expectations and we offer them the possibility of full customization of each boat.

TJ TECHNOLOGIES SP. Z O.O.

43-100 Tychy, ul. Estetyczna 4
mobile: (+48) 518 990 782
e-mail: info@tjboats.com
www.tjboats.com

Our specialty are motorboats made using innovative technology of welded high-density polyethylene (HDPE).

Boat hulls made of this material have a number of advantages:

- high durability in everyday use
- resistance to damage during impact when reaching a rocky shore, quay, other vessel or running aground, and even in contact with ice
- resistance to external factors, no corrosion, no oxidation under the influence of UV radiation
- less susceptibility to fouling by biological agents compared to other materials used for boat hulls, eliminating the need to cover the bottom of the hull with anti-fouling agents
- resistance to most chemicals
- ease of repair (polyethylene losses can be filled in the welding process)
- care for the natural environment thanks to the possibility of recycling

the hull

- low carbon footprint, five times lower than in the case of aluminum
- no need to produce molds for the production of the hull, which allows for virtually any deck arrangement
- up to 10 years warranty on the hull

We offer motorboats with hull lengths from 4.5 to 6.5 meters. We successfully complete orders with tailored deck arrangements for specific, specialized applications. Water rescue, fire brigade, police, diving bases, kite-surfing bases, motorboat schools and the army are just some examples of applications for our motorboats.

PPHU TOPIKO

11-600 Węgorzewo, ul. Przemysłowa 7c

We offer a comprehensive preparation of stainless steel components. The processes that we carry out include: turning; milling; laser cutting; sheet and tube bending; welding and polishing.

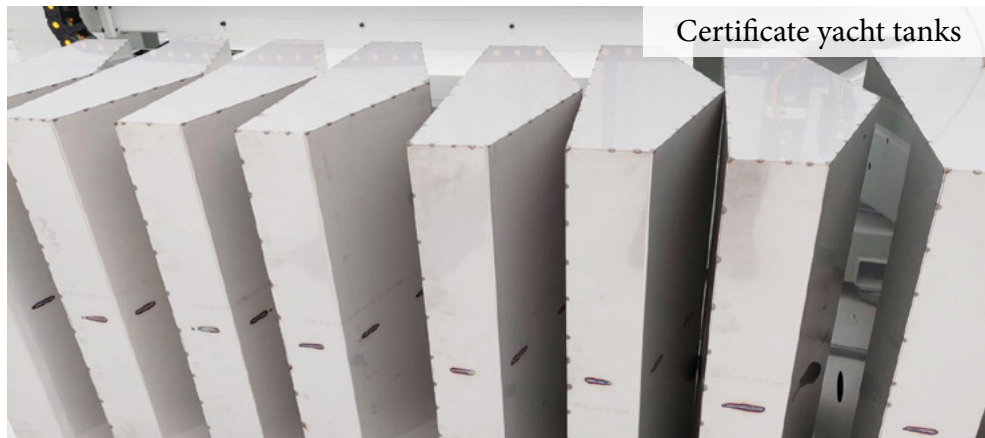

We have more than 20 years of experience in manufacturing:

- yacht fittings
- certificate yacht tanks
- railings
- equipment for swimming pools, harbours, etc.

We carry out orders for both individual customers and large companies throughout Poland and abroad.

We have always strived to ensure high quality and precision of our products. Since 2022, thanks to a new production hall, high-end machines and qualified staff, we have reached even higher standards. We now provide guaranteed consistency and precision of the manufacture and have increased our productivity and production capacity.

Certificate yacht tanks

OUR CLIENTS APPRECIATE OUR:

- professionalism
- punctuality
- ability to carry out individual orders

Feel free to send your inquiries.

Thanks to the recently introduced services performed on CNC machines to our offer we can guarantee faster processing times as well as more favourable and competitive prices.

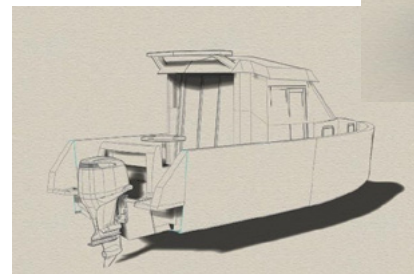

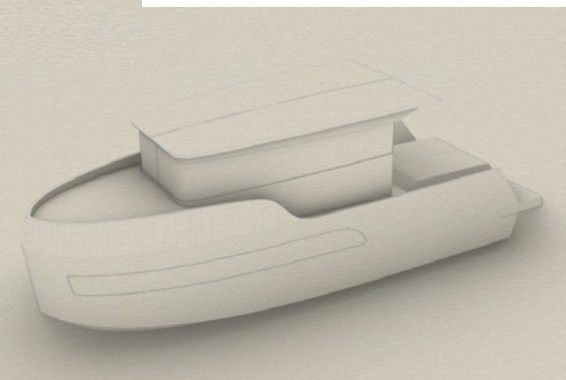

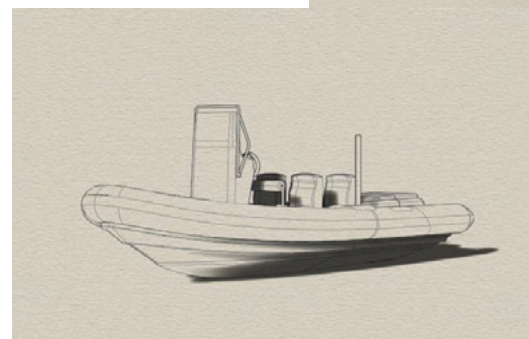

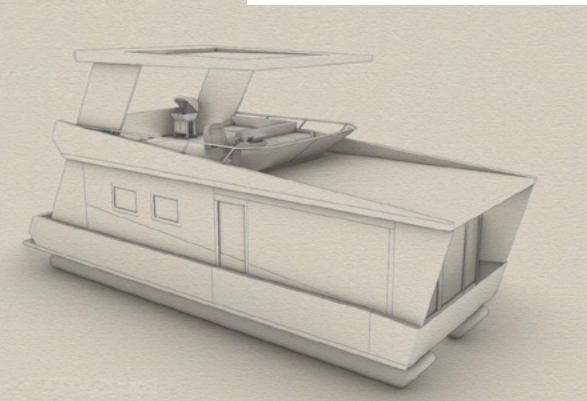

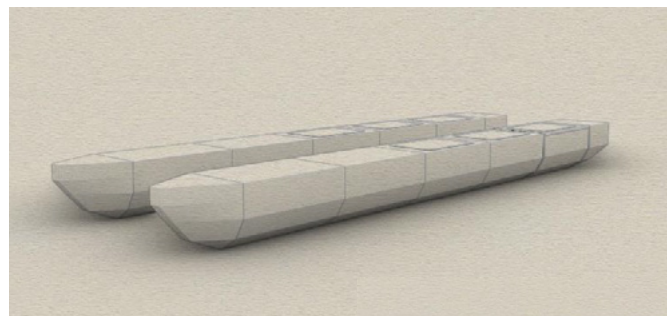

V DESIGN WŁODZIMIERZ DOLIŃSKI

80-241 Gdańsk, Al. Grunwaldzka 56/113
mobile: (+48) 664 318 706
e-mail: wd.vdesign@gmail.com

V Design was officially established in 2017, but its founder, naval architect Włodzimierz Dolinski has been in the marine industry for almost 20 years, working with the most important and largest power boat shipyards in Europe.

The company offers professional assistance in design, technology, production organization in a variety of boat manufacturing sectors and shipyards around the world. The professional portfolio of the owner of V Design includes a full range of boats and yachts, from small fishing boats with outboard engines, RIBs, larger motor boats with inboard engines and houseboats, up to a 50m luxury motor yacht. The variety of tasks performed so far has allowed the company to gain a wealth of professional

experience, as well as to accumulate a large group of satisfied customers. Thanks to unbridled curiosity and the need for constant development, the founder of V Design has started this year a new project called EV Boats Europe focused on implementing modern solutions related to electric drives for all boats and yachts. The main direction of activities will be a comprehensive offer of design, supply and installation of electric propulsion systems along with energy management systems.

VA | VARUSTE

www.vetus.com

VETUS, Creators of boat systems.

Developing innovative systems for your boat is truly what VETUS is about. VETUS invents and develops systems consisting of a wide range of products to keep your boat in excellent technical condition.

For 50 years VETUS has been one of the world's leading companies when it comes to innovative products for pleasure craft and small commercial vessels. Our catalogue is regularly consulted by the engineers and designers from leading yacht builders and used as educational material in marine training establishments for good reason.

Warranty and service

VETUS has a comprehensive worldwide service programme. VETUS not only offers a 3-year warranty for equipment and a 5-year warranty for engines, but also guarantees you can receive service wherever you are in the

world. If necessary our technical service engineers fly all over the world to solve technical issues.

VETUS

The VETUS range of products consists of more than 3.700 high quality products, of which 70% are partly or completely developed in house. These products are divided into fourteen onboard systems, such as exhaust, manoeuvring, fuel, fresh water, waste water and anchoring systems. In short; VETUS is the one-stop shop for all your technical installations onboard!

VETUS brands:

Maxwell

For more than 40 years the name Maxwell has been synonymous with high quality anchoring systems for pleasure boats, super yachts and commercial vessels. In the marine industry, Maxwell products are renowned for their quality, innovative design, performance and reliability. Maxwell breakthroughs include the introduction of the world's first automatic rope/chain windlass in the mid 1990's, the Freedom series, which in the true Maxwell custom of constant improvement, has now been replaced with the brilliantly evolved RC series. Maxwell's comprehensive programme of windlasses, capstans and accessories provides optimal anchoring solutions for boats from 6-90 metres, backed up by the industry's most knowledgeable and experienced engineering, sales and support team.

Marex

Marex is a leading manufacturer of custom made boat windows and has been active in the marine market since 1950. Marex offers several base product ranges including: "Marex Screw-On Line", "Marex Comfort Line" and "Marex Exclusive Line". The Marex brand stands for quality, innovation and design.

V-Quipment

V-Quipment is a diverse range of high quality marine products carefully selected for every boat owner at an affordable price. All selected V-Quipment products are tested and approved in the VETUS test lab in Schiedam and therefore meet our 3 year warranty requirements.

V-Quipment covers a wide variety of products to meet the needs of every boat owner. The range is divided into themes groups - Comfort, Deck Equipment, Fittings, Pumps, Outboard, Accessories, Hinges and Locks.

WATERBUS S.C.

05-870 Błonie, Nowa Wieś 9
mobile: (+48) 604 575 905
e-mail: office@waterbus.pl
www.waterbus.pl

Waterbus - Polish producer of houseboats, commercial boats and pontoons.

We have been water enthusiasts for many years. Our passion has turned into an idea for a business – this is how Waterbus was created. We specialize in the production of houseboats, commercial boats and hulls.

All models are produced to customer order. The customer has the opportunity to customize the boat according to his needs thanks to a wide range of additional options. The models we offer start from 9.5 to 15m meters in length. The basis of our boats are hulls made of aluminum resistant to sea condi-

tions. These hulls have been designed and patented by us. Thanks to the use of appropriate aluminum alloys, 3D technology in designing, frame construction made of profiled sheets our structures are light and durable. The superstructure of our boats is made of very strong sandwich panels. Low weight and very good insulation qualities are their main values appreciated by our clients.

The quality of our boats has been appreciated by many buyers in Poland and foreign customers.

WAVE BLUE SP. Z O.O.

04-768 Warszawa, ul. Mrówcza 165C
mobile: (+48) 503 912 552
e-mail: info@wavecatamarans.com
www.wavecatamarans.com

The finest yacht designs come from experience and chasing a dream. And so began the story of Wave Catamarans, a boutique shipyard created by lovers and enthusiasts of multihulls. These devotees had tirelessly sought a catamaran that would provide maximum comfort and not at the cost of sound nautical properties. They wished to go beyond everything that had been on the market to date. Together, with the counsel and input of architects and naval designers, the Wave Catamarans were born.

Building a tailor-made yacht, is the purest of creative processes. It is where the dreams, desires and demands of the client become a reality. This is Wave Catamarans' ambition – to build unique catamarans

which reflect the clients' deepest, innermost expectations. As a boutique shipyard, the goal of Wave Catamarans is not just to build yachts for the client, but to build them with the client - to afford them the opportunity to provide input every step of the way

throughout the design and construction process. The building of a yacht is, after all, the beginning of a new adventure for the client, and the yard's designers, naval architects and engineers will act as their guides as they embark on a new, unforgettable journey

WHITE EAGLE BY P.P.U. EKOWENT SP. Z O.O.

mobile: (+48) 509 371 668, 510 099 610
e-mail: office@whiteeagle.vip
www.whiteeagle.vip

Welcome to the world of luxury MOTOR YACHTS! It all starts with an idea and culminates in the construction of a state-of-the-art. BOAT. We specialise in custom-made yachts, build to the specifications of our customers; Our main assets include the supreme quality of our craftsmanship and our attention to the smallest detail. Our yachts combine cutting-edge technologies and a creative look, and every design is a well-thought-out vision, that takes into account style, functionality and safety. Our company was created to make your dreams and visions of world-class sailing come true!

White Eagle – sailing with class. The brand was created by US – two brothers, Artur and Rafał Osipowicz, engineers by education, businessmen by trade and sailors by choice! Our fascination with yachting led us to the idea of creating a MOTOR YACHT that would meet all of our dreams and visions. And so, an idea was born to combine our passion with business and make our plans a reality.

We started working on our plan in 2015, by building a shipyard: we in-

vested in machines and tools and hired a team of boat building professionals. We wanted our motor yachts and boats to be built by people who were both professional and passionate about their work, who would share our commitment to

ensure the highest quality of workmanship. The boatyard is currently located in the centre of Łódź, at 97 Pojezierska street. It's in this relatively small indoor yard where our unique designs come to life under our close supervision.

ACTIVESOL is a part of XDISC group, which manufactures semi-flexible photovoltaic panels in Poland. Established in 2003 company offer covers standard and bespoke PV systems. Semi-flexible ACTIVESOL panels are the company's flagship products and are widely appreciated for high performance and exceptional aesthetic by customers all over the world.

Our products are ideal independent power sources used in the marine, camper, aviation and advertising industries. Reliable, light, waterproof and quiet, ACTIVESOL panels are the perfect companion full of energy!

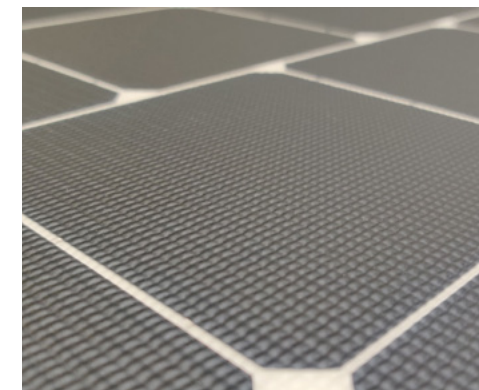

ACTIVESOL panels are extremely easy to install and require virtually no maintenance. Despite their low thickness, they are durable and - fully sup-

ported - can withstand pressures of up to 100 kg. Aesthetic, robust and flexible, ACTIVESOL panels can be installed in almost any location, even on a slightly curved surface. The panel's aesthetic appearance makes ACTIVESOL an attractive fixture.

ACTIVESOL flexible panels includes 2 families: ACTIVESOL LIGHT and

ACTIVESOL ULTRA with power ranging from 75W to 180W. Should off the shelf panels be not enough, there is a possibility to order bespoke panels – with fitted shape and power. Custom made photovoltaic modules are designed to fulfil specific requirements (power, shape, cell type and accessories). Custom made solution has been developed especially for built-to-suit applications. Everyone who values good-looks as much as ecology and economy, can also choose the colour of the module's backsheet and cells.

Apart from the flexible PV solutions XDISC also provides customers with the on-grid and off-grid photovoltaic systems based on standard PV modules as well as with integrated solutions, where PV system is planned already at the project stage and forms the integral part of the construction envelope. Make use of natural power with XDISC - the best partner under the sun!

XO BOATS POLAND SP. Z O.O.

16-300 Augustów, Ul. Białostocka 3

e-mail: pawel.masianis@xoboats.fi
www.xoboats.com

XO Boats, a manufacturer of motor boats, with characteristics hybrid structure - aluminum hull, composite deck within a size of 8 meters, in close future up to 12 meters.

Its range includes 3 types of boats

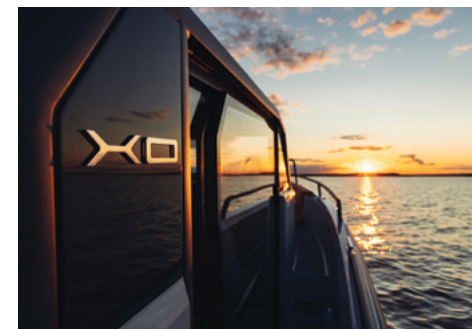

- DFNDR
- EXPLR
- DSCVR

XO philosophy

While the others stay in port, the XO's boats keep going. We enable you to discover the farthest corners of the sea - ensuring that every time you set off you will be able to come back with unforgettable stories to tell.

Our mission is to take you beyond the conventional, time and time again. We are determined to provide the best solution for those looking for new levels of active swimming enjoyment.

The unique concept of the XO boats has been designed with the needs of a wide range of active users in mind.

Our most important feature that sets us apart from others is the excellent driving experience. The aluminum hull gives our boats the features of high-quality, professional marine vessels

The unique concept of the XO boats lies in their designs: the XO has been created to meet the needs of a wide range of active users. The key to the durability and excellent handling

characteristics of our boats is the deep V aluminum hull. Aluminum is not only a popular choice with professional users, but also has advantages that recreational boaters can benefit from as well. Aluminum is rigid and durable, yet extremely light and does not require constant maintenance. Aluminum is also an excellent material as it is considered extremely safe.

The YACHT HORNET company was established in 1997 in Iława. Geographical location – near the lake Jeziorak, prompted us to provide services related to the construction of yachts. We build yachts interiors at the customer's request. We work with renowned yacht shipyards producing various types of yachts. Many years of experience in sailing regatta allows us to trim the sails and rigging of the yacht, increasing its efficiency during sailing. We guarantee reasonable prices and timely delivery of the yacht.

The Hornet 29 yacht was created as a result of 25 years of experience in the construction of sailing yachts. It is a yacht refined in terms of nautical and aesthetic. Meets the requirements and needs of our shipowners. Hornet 29 is one of the few yachts on the market where the interior layout (to some extent) is free. You can have from one to three cabins closed by a door or not have cabins at all. In the three-rib version, two stern berths have a width of 145 cm each. You can have a toilet here from a tiny to a big bathroom, and kitchen on almost the entire right side - other versions also come into play. In all options, the interior is made in boatbuilding technology, i.e. waterproof plywood and precisely machined solid wood. It comes in a version with a steering

wheel or a tiller. The yacht is additionally equipped according to the owner's needs with various elements of electronics, hydraulics, accessories, etc.

Yacht Hornet specializes in individualized production, and Hornet 29 is our flagship unit, offered to individual clients as well as to charter companies. We also produce other sailing units at the shipowners' request according to their needs. We fulfill individual dreams of sailors.

Our offer also includes motor boats, which have been very popular in recent years.

Our yachts meet all the requirements related to the safety of shipping. We build the yacht in accordance with the documentation and recommendations of the constructor.

YACHTSMEN.EU

mobile: (+48) 602 248 955
e-mail: stanislaw@yachtsmen.eu
www.yachtsmen.eu

Yachtsmen.eu is a platform focusing on the coverage of water sports in Poland. We are not just an online portal, but a multi-media outlet producing and presenting high-quality news, pre-views, and reviews. All this include extensive video and photo on-site coverage. We start with the materials for the general crowd, showing their first interest in motorboats and yachts. We then dive in with more in-depth with content aimed at seasoned passionate, but also have all the details for the real professionals. All produced content is fully social-media ready.

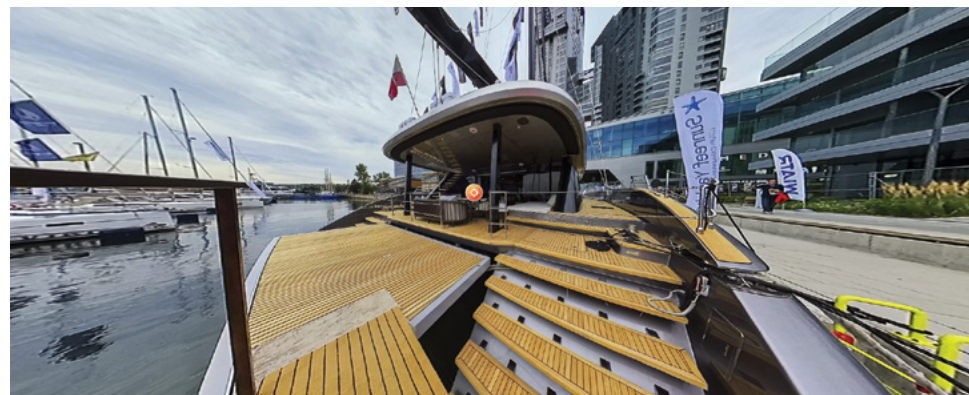

We produce and edit in accordance with the latest trends using the newest equipment (4k cameras, dedicated lenses depending on the subject, etc.). This results in unique materials, which go beyond the standards of traditional press publications.

PICTURES

One picture says more than a thousand words - this slogan has never been so relevant. We live in age of social media and the ever-growing popularity of Instagram.

Good photography is essential!

With this in mind, we take great care with the photo content during our productions. Our authors are equipped with professional photo smartphones for fast social media publishing, as well as professional equipment for high quality photos.

VIDEO

On our YouTube channel we publish video tests, presentations, interviews, event reports and many other

film forms. Depending on the needs, we create simple productions as well as professional productions with cinematic image quality and complex editing.

Each realisation produces a large amount of material in various forms, ready for "sharing" on social media platforms.

We look forward to working with you!

ZBROJA ADWOKACI SP.K. (LLP)

70-800 Szczecin, ul. Przestrzenna 11/4
phone: (+48 91) 488 44 22
e-mail: kancelaria@zbrojaadwokaci.pl
www.zbrojaadwokaci.pl

We are the legal office providing comprehensive services for the maritime and yacht industry entrepreneurs. The founder of Zbroja Adwokaci LLP - Patryk Zbroja is both an advocate and a sailor. We know and understand the sector very well. We are also experienced in cases related to it. Respecting individual needs of our clients, following the rules of trust, loyalty and good communication are our fundamental principles.

Our active and professional team offers legal services for maritime economy entities and yacht shipyards, including legal compliance, negotiations, court and ADR disputes. We analyse the contracts related to shipbuilding, including offshore wind, yacht, mari-

time and inland industry. We carry our clients through a safe yacht purchase and efficient registration. We conduct the cases of compensation claims for the sea and traffic accidents as well as criminal cases related to all incidents in a water traffic.

WE PRODUCE YOUR QUALITY

BWP Skórkiewicz Sp. J.
ul. Al. Lipowe 6a, 19-400 Olecko
<http://www.bwp-skorkiewicz.pl>

BWP Skórkiewicz is one of the Masurian's region largest manufactures of hardware for the marine industry.

Main activity of the company is production and processing of stainless steel, acid-resistant and aluminum elements, marine doors and window systems, fuel tanks as well as composites.

We are distinguished from other hardware manufacturers by the plugs and molds production department present in BWP. This enables to prototype and validate components already at the plug production stage.

We gained valuable experience in manufacturing different types of t-tops and bimini roof supports in many sizes and leg configurations to select from. The legs are typically made from marine-grade aluminum with polished or powder-coated finish.

Aluminum framed windshields & side windows with glass or plexi, flat or curved are not an arcane knowledge for us. BWP manufactures fixed or sliding marine doors & windows. The marine windows & doors are custom made to meet client's specific requirements. Our team is dedicated to bringing you the highest quality products with a competitive price.

Sklejka Trade specializes in distribution of marine plywood in Poland and we also export our products to many countries, including the Netherlands, France, Germany, Croatia and outside

We produce plywood in various thicknesses and formats covered with coatings such as PPL, CPL, HPL, rubber, and natural veneers. To our customers we deliver ready-made or semi-finished products made at our joinery. We have industrial CNC routers, our own pressing line, and many other woodworking machines that allow us to manufacture plywood products and other products according to the customer's project and wishes.

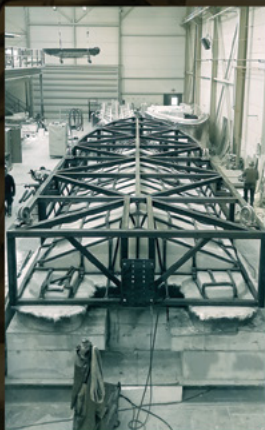

With over 18 years of experience in the industry we advise our customers to choose optimal technical solutions. Our strength lies in reliability and fast delivery time.

///TECHNOLAB

Your Satisfaction is Our Priority

TechnoLab specializes in production of sailboats & motorboats. With a well-organized technical structure and experienced team we are able to produce plugs and molds, GRP parts and complete boats in the highest quality. Each production process: design, construction, lamination, mold shop, assembly, testing and quality control is conducted in-house.

TechnoLab incorporates fundamental yacht manufacturing equipment and systems including important testing equipment as well as our 5 axis router and CNC milling department which ensures the best and most accurate molds.

CATAMARANS
DREAMS ARE CLOSER

*Welcome on board
Capitan*

CREATED BY ENTHUSIASTS OF SAILING AND MODERN TECHNOLOGIES

Years of maritime and business experience as well as an in-depth study of the yacht market contributed to the decision to build a shipyard that would produce fast and comfortable vessels. Our models are 33, 50 and 60 feet. Materials, equipment, colors, etc. are being chosen according to the needs and preferences of our customers.
